I. Read Executive Engineer's docket No. 337, dated 24th May last, forwarding copy of Chief Engineer's docket No. 2156, dated 20th idem and subsequent correspondence regarding funds required for metalling and constructing tunnels on the Sagar-Siralkoppa road. While the Board recommended certain Local Fund* roads, costing annually Rs. 6,700 for their repairs being transferred to Provincial Funds, two system of roads in the Sagar and Channagiri Taluks estimated to cost 5 and 1½ lakhs of rupees respectively were sanctioned to be worked out, out of the District Funds.

The Chief Engineer states that unless the grant to the Public Works Department from the Provincial Funds is increased, the two systems of roads cannot be taken over by his Department.

Resolved that the Government be solicited to increase the grant from the Provincial Funds for the purpose. Further to order the transfer of the said Local Fund roads for their maintenance to the Provincial Funds. The Board respectfully urge once more that unless they are helped in the manner above indicated they are not in a position to meet the expenditure (Rs. 15,055) now sanctioned on the Sagar-Siralkoppa road or even to incur the usual annual expenditure and to complete several important road systems which could not be completed for years simply for want of funds, *vide* Memorandum attached.

Memorandum to accompany the Resolution No. I of the Proceedings of the Special Meeting of the Local Fund Board convened on 3rd July 1893.

In Government Order No. 1125-6—47 of 2nd May 1890, the proposals of the Board for utilizing annually Rs. 30,000 for works benefiting the District out of the large balance of Rs. 1,06,486 for the year 1890-91, were sanctioned. In accordance therewith the following useful works were started and some of them completed, while others have far advanced:—

	Name of Work.	Estimate.	Expenditure to June 1893.	Balance.
1	Bridging Kumadvati River near Shikarpur	45,737	44,684	1,053
2	Do Haridravati River between Sagar and Kallurkatte	37,009	34,479	2,530
3	Do Siralkoppa-Hanagal road	37,305	36,113	1,192
4	Do Anantapur-Shikarpur road, 1st Section	14,263	14,362	Completed.
5	Opening out Koppa-Tirthahalli road	27,400	25,325	2,075
6	Avinahalli-Karur road	32,249	21,199	11,050
7	Talaguppa-Aralagod road	33,730	23,132	10,598
8	Sulikere-Sasalu road	13,490	6,718	6,772
9	Channagiri-Malebennur road, 3 Sections	57,211	21,791	35,420
10	Bridging Amachihalla between Sagar and Siralkoppa	12,722	12,797	Completed.
11	Do Warada do do	15,826	15,801	Completed.
	Total...	3,26,942	2,56,401	70,690

2. From the above it will be seen that the total sanctions amounted to Rs. 3,26,942 and expenditure to June 1893 to Rs. 2,56,401, leaving a balance of Rs. 70,690, for which a provision of Rs. 14,900 is sanctioned in the Budget for 1893-94. This is nearly $\frac{1}{2}$ of the balance sanctioned which is not enough to push on with the works. The incomplete works have so far advanced that it is necessary to complete them as fast as possible to save damages to work already done and to make the several roads opened useful for the public.

3. Of the works enumerated above, items 1 to 3 are nearly completed, items 4, 10 and 11 are quite completed, items 5 to 9 being openings of new roads are incomplete. They are fully opened and formed but partly and tunnelled and gravelled.

4. So far we have been able out of the large balance of Rs. 1,06,486 and with the annual receipts to complete 5 important bridges and to open up 78 miles of new lines of communication to complete and extend which we now fall short of funds. Further there are three important roads already opened some years back, but left unbridged for want of funds. They are (1) Anantapur-Tirthahalli, (2) Anantapur-Kallurkatte and (3) Honnali-Shikarpur road.

5. In the Budget estimate of receipts for 1893-94, the total under all the heads amount to Rs. 88,090. With the recurring charges as detailed in margin amounting to Rs. 43,632 there remains a balance of Rs. 44,458 to be expended on original works. With the usual establishment charges, this small balance is not sufficient to provide adequately for the works in progress and to take up the extension and completion of many much desired roads in the District notably the Sagar Malnad and Channagiri systems. Traffic on our District Fund roads has been increasing year by year and several of them require special attention. The roads which have been heavily worked are:—

- | | |
|---------------------------|---|
| (1) Sagar-Siralkoppa. | } Important Railway feeders, between Sagar, Sorab, Malnad and Byadgi. |
| (2) Siralkoppa-Hirekerur. | |
| (3) Shimoga, Sorab-Sirsi. | |

and their condition is anything but satisfactory. Gravel obtainable in many places is indifferent and metalling cannot be resorted to from the small allowances allotted annually. An estimate for metalling the very urgent road between Sagar and Siralkoppa though sanctioned by Government on 8th June 1893, has been kept by for want of funds. Under these circumstances the Board recommend for the consideration of the Government that a special grant may be made from Provincial Funds for the two systems of roads in Sagar and Channagiri, as the Public Works Department Secretary in his No. 2118-368 of 19th May 1893 to the Chief Secretary has opined that with the present Provincial grant for the District it is not possible to take up the roads under Provincial.

Mr. Narasimmaiengar suggested that subjects might be taken up according to their urgency as the Board might have time to dispose of all the subjects. Agreed to.

The President said that before commencing work he would draw the attention of the Board to the proceedings of the Rate-Payers' Association at its last meeting as reported in the Newspapers. Ordinarily he would take no notice of incorrect statements made by Rate-Payers who are ignorant of

the real-state of things or who have no means of ascertaining facts, but when members of the Municipality, who are given every facility of ascertaining facts and who have only to write to him for information, make incorrect statements, the matter assumes a different aspect. There is no excuse for them. The President did not understand why Municipal Commissioners should try to throw dirt on the body, to which they belonged or its executive.

He said he referred to the statement that owing to the neglect of the City Authorities "the Dharmambudhi tank received only a few gallons of water" from the Hebbal tank while the Darbar spent thousands of rupees on the scheme. The President said he held a letter from Major Grant, which could tell them that the Dharmambudhi received 23,20,000 gallons. How such a large quantity could be called a few gallons, he did not understand.

Mr. Cook enquired whether Municipal Commissioners were present at the meeting.

The President said that the newspaper report said that the chair was taken by a Municipal Commissioner and the statement referred to by the President was made by a Municipal Commissioner.

Mr. Venkataramaiya said that it was he that made the statement which was based on the information given to him by the officials at the Hebbal Pumping Station. He said that he asked the Vice-President about it and was told that the Vice-President was not responsible.

The President asked why Mr. Venkataramaiya did not write to the President.

Mr. Scaldwell said that he was astonished to hear that Major Grant said that the officers of the Darbar were neglectful, while Major Grant was responsible for the delivery of water at the reservoir at Sankey's.

Mr. Venkataramaiya correcting said that Major Grant was not his informant as he had left the station 5 minutes before Mr. Venkataramaiya went there.

Mr. Scaldwell continued and said that he understood Mr. Venkataramaiya to say that Major Grant was his informant. He added that he kept a Register showing how much water was supplied to the Civil and Military Station and how much to the City, and if Mr. Venkataramaiya had asked the President he should have got the correct information.

The President said it was not his intention to ask the Board to take any action. His object was to make the members know that the President would gladly furnish any information asked of him and if in spite of it Commissioners should choose to publish incorrect reports, he would be however reluctantly compelled to ask the Board to consider the conduct of such Commissioners and to decide whether steps should not be taken to have them removed.

I. Cash Account Current, Mortuary Returns, Itinerant Medical Officer's Return, Demand, Collection and Balance statement, Progress reports of the works and Memo of visitors to the Srinivasa Mandiram Library during the month of June 1893.

Resolution.—Mr. Subba Rao referred to the balance of revenue to be collected and desired to know whether the whole of it was for collection. The Vice-President explained that the recoverable balance was only about Rs. 6,000. Mr. Subba Rao next pointed out that the Kasivisveswara Temple road was not shown in the Progress Report of works and drew attention to its bad condition. Resolved that the road up to Mr. Setu Rao's house should be taken up without delay.

At the instance of Mr. Venkataramaiya the consideration of this was reserved for the next meeting.

- (2) Mr. Subba Rao withdrew his proposition in regard to the Sanskrit College.

XI. Election of the Municipal Commissioners for the ensuing Representative Assembly and the subjects to be discussed:

Resolution.—Mr. Leonard spoke at some length and explained the difficulty arising from the rule which restricts the election to Non-Official Members. He thought it was desirable that members elected should know English. He proposed that the Government be moved to revise the rule so as to render eligible Official Members appointed by election. He believed the Government would accept the proposal as the rule had been framed before elective franchise was conceded to Bangalore. Mr. Cook thought that the exclusion should be limited to Ex-Officio Members. He would make no difference between officials appointed by Government and those appointed by election.

Mr. Leonard was willing to modify his proposal accordingly.

Mr. Gangaiya spoke in favor of the proposition and seconded it.

Mr. Sambasiva Iyer pointed out that the rule in question was framed in consequence of the objection once taken at the Assembly to the election of an official by the Bangalore Municipality.

The President said that the original proposition was more likely to succeed.

After some further discussion Mr. Subba Rao pointed out that the subject was out of order as the subject before them was the election of Representatives.

The President agreed with him. Though the subject under discussion was connected with the subject as set forth in the list of subjects it related to the principles of election of which no notice had been given. The subject was dropped.

Mr. Subba Rao declining to be elected, Messrs. Hafizulakhan and Basappa Chetti were elected.

The following subjects were chosen for discussion at the Assembly:—

1. That the Government be requested to make a grant from the Provincial Funds in aid of roads, drains and other improvements.
2. That the tanks in the City may be maintained and supplied with water as at present after the Hessarghatta water scheme is completed.
3. That the Government may be requested to transfer to the Board the Government share of the Octroi duties.
4. That instead of the draft Municipal Regulations the revised Regulations in force in the Civil and Military Station be extended to the City.

VI. Proposal to construct Bandy-stands near Irangere, Bandigere, Wakkalgere, Soppangere, Kannegaudankoppal and Padavarahalli.

Resolved that the Vice-President, in consultation with the Commissioners of the respective Mohallas, do select suitable sites for Bandy-stands wherever necessary and enclose them, reporting on the subject by the next meeting.

VII. Purchase of 60 Iron covers for sewage and storm water drain manholes in the Fort, at an outlay of about Rs. 750.

Resolved that a supply of Iron covers to the value of Rs. 500 be purchased.

Resolved further that 12 Iron gas-pipes and Rs. 500 worth of Iron water-pipes be also purchased for use in the Municipality.

VIII. *Resolved* that the Executive Committee of the Rate-payers' Association may be allowed the use of the Town Hall on the first Saturday of every month for its meetings, and that intimation thereof be given to the Vice-President one day previous to the said meetings.

IX. *Resolved* that instead of the cash deposit of 300 rupees, the lighting contractors be permitted to furnish a security for Rs. 200 and to deposit a sum of Rs. 100 in cash for the faithful performance of their contract.

X. *Resolved* that the salt fish shops be shifted from their present place in the Devaraj Market to some place less objectionable to the north of the mutton butchers' stalls, to abate nuisance.

XI. *Resolved* that the reconveyance of a piece of land in the line behind Krishnavilas Agrahar, Devaraj Mohalla, to Raghavendra Rao for Rs. 32 is approved.

XII. *Resolved* that old receipts, counterfoils and other papers up to 30th June 1891 excepting Registers belonging to the Sayer Department be destroyed.

XIII. *Resolved* that the Vice-President do select a suitable place where the Octroi duty on timber may be collected without compelling the owners or cartmen to take the same to the Sayer Cutcherry for the purpose, as at present.

XIV. *Resolved* that the tax on the house attached to the Palace, but occupied by Mr. Nanja Raj Bahadur in the Fort and which tax was discontinued to be collected from Vikruti, be revived after a notice to that Gentleman to show cause why the tax should not be collected.

Resolved further that the portion of the Chattram occupied by the Palace Controller may not be subjected to any tax.

XV. Read Government Order No. 1560-1—L. F. 7-93, dated 24th July 1893, regarding the payment of Rs. 3 per month to Mutrajjamma out of Municipal Funds, &c.

Resolved that, instead of securing a suitable site and building a new Matt at the cost of the Municipality, it would be advantageous to continue the payment of Rs. 3 for the maintenance of this old and crippled woman during her life time.

XVI. Read letter dated 28th July 1893, from Mr. Annaiya Pandit, Municipal Commissioner, suggesting certain alterations to the existing stalls in the eastern frontage of the Devaraj Market and construction of stalls towards the north of the eastern frontage instead of building the western frontage, &c.

Read also the 4th and 5th propositions of Mr. A. Ramanna, Municipal Commissioner, of 24th June 1893 on the same subject.

The Board in its 5th Resolution at its meeting held on the 25th March 1893 accepted the Government's proposal to construct the western frontage but on reconsideration, it has now come to the conclusion that the construction of such costly western frontage is not required. It is, on the other hand, of opinion that the extension of the eastern frontage towards the north to a point at the junction of the Hospital cross road would be a more useful and better improvement. The Board is also of opinion that the stalls facing with Sayaji Rao road are not separated from the stalls facing the inside of the Market and that it is highly necessary to partition them off by a wall between and on both sides with wooden shutters in front, in order that they may contribute to the convenience and safety of the property of the tenants.

The chief grounds in support of the proposal are :—

1st.—That the proposed extension towards the north will give a better appearance to the Sayaji Rao road which is an important road, and is generally the route of processions on State occasions from and to the Railway Station, the western side of the Market being insignificant, and not requiring any costly ornamental frontage.

2ndly.—That, if this extension is carried out, it would be in continuity with the Lansdown Bazaar to the south of it.

3rdly.—That when the stalls are enclosed by walls and shutters as suggested, they will certainly be with the wishes and requirements of the tenants and thus enable the Board to realize better rents.

4thly.—That it will also enable the Municipality to provide room for the Municipal Offices and Sayer Koti, the shifting of which to a more convenient locality is under contemplation.

For these reasons the Board resolve that the proposition be submitted to Government for approval.

Read Proceedings No. 1874—L. F. 334-92, dated 12th May 1893, stating that Local Fund Board Meetings may be convened at any place consistently with the convenience of the majority of Members.

Recorded.

Read the Local Fund Board Proceedings of 25th May 1893, regarding the necessity or alteration of the present proposed extension of the Bababudan Hill road.

Resolved that the subject be post poned for discussion at the next Meeting as, among other reasons, the statistics called for as regards the contribution, &c., have not been fully received.

Read also the same Proceedings regarding the desirability of securing permanent professional hands of some status to help the Amildars in getting up estimates and in supervising works.

Resolved that the orders of Government be awaited on the matter.

The list of complete and incomplete works sanctioned from several funds was then read to the Members.

Resolved that application be made for funds as per accompanying statements for incomplete and other works of Public Works and Revenue Departments, as the amounts allotted in the current year's Budget is found inadequate.

Also resolved that Rs. 10,000 be applied for from Local Funds General for new works of public utility for execution by Revenue Department (*vide* Local Fund Board Proceedings of 25th May 1893).

Statement No. 1.—The receipts show a net increase of Rs. 5,370. The Talukwar details are annexed. A decrease is observed in one or two Taluks, the largest being in Heggaddevankote namely Rs. 524. The reason for this difference has not been explained.

2. Statement No. 2.—The following table exhibits Talukwar the 76 per cent of the one anna cess credited to the funds during the year and the receipts under the other heads:—

This amount includes besides the usual charges a proportionate cost of the Local Fund Establishment maintained in the Dewan's office, the pay and scholarships of midwives while yet under training and the moiety of the cost of purchasing breeding bulls supplied to the Taluks of Mysore, Gundlupet and Hunsur.

5. *Conservancy and Sanitation*.—Rupees 4,300 were sanctioned in the Budget for expenditure under this head. Out of this amount Rs. 300 have been spent on the creeper plantation at Talkad. No general attempt was made by the Amildars to utilize the grant for Sanitary works though their attention was called to this subject in this office Circular No.

6. *Well works executed by the Revenue Department*.—A provision of Rs. 8,000 was sanctioned in the Budget of the District Funds for the construction of new wells and the repair of old ones where necessary. This provision was also supplemented by a further grant of Rs. 10,000 from the Local Funds General. The actual amount of outlay incurred on the several works executed by the Revenue Department has not yet been definitely known. But the advances made towards the execution of the works as per particulars yet ascertained, amounted to Rs. 4884. It is to be noted here that the marginally noted works which were completed at the close of the year and which cost Rs. 527 were not paid for as their completion reports had not been received in time. A Talukwar statement is appended of well works sanctioned and completed.

POLICE DEPARTMENT.

The 5th October 1893.

DESCRIPTIVE ROLL

and history of a man wanted by the Police of the Mysore District, for offences under Sections 328—379 of the Indian Penal Code (Mysore Taluk Crime No. 3—64 of 1892). Warrant issued by the Amildar, and 2nd Class Magistrate, Mysore Taluk.

Name.—Shesaiya. *Father's name.*—Subbanna. *Caste.*—Brahmin. *Age.*—63 years. *Height.*—5—3½". *Complexion.*—Fair. *Taluk.*—Goribidnur, Kolar District. *Village.*—Dodda Turugode. *Language.*—Kanarese. *Marks of identification.*—A scar near the left ear. 2 scars on the breast and a big mole on the belly. *Profession.*—Formerly Shanbhog of Kunigal, Tumkur District.

In November 1885 this Sheshaiya with a friend of his named Komti Ramachandraiya of Kunigal went to Koratagere, Tumkur District, and purchased for credit some cloths from one Saravana Mudaliar and his son Muttu Mudaliar saying that they were also trading in cloths in the village of Tengode, and gaining familiarity with Saravana Mudaliar and his son, mixed some stupefying drug in their food, which rendered them senseless, and disappeared, with all the cloths the merchants had with them. They were duly arrested and placed before Mr. Krishnaiengar, General Assistant Commissioner and 1st Class Magistrate, Tumkur District, who committed them to the Court of Session, Nundydroog Division on charges under Sections 417—328 and 379, Indian Penal Code, where they were convicted and sentenced to suffer 6 years' rigorous imprisonment each.

2. Sheshaiya after his release from the Mysore Jail, on the 18th November 1891, proceeded to Hulyurdurga, Kunigal Taluk, and put up in Hanumantz Chetti's Chattram. He contracted friendship with a Bestar woman named Kempri and remained there for a time. A Vaishnama (Satani) named Gunda of Anatiballi subsequently became his intimate friend.

3. In the beginning of November 1892 Sheshaiya and Gunda went together to Ramanattapur Jatra, Arkalgud Taluk, Hassan District. Here they hired a cart to go to Mysore, Gunda pretending to be the servant of Sheshaiya whom he represented to be a Parpattegar of Mysore. One Mallanna of Dalegaudanhalli, Holé-Narsipur Taluk, drove the cart, and on the way to Mysore they halted at Gungaraj Chatter, Mysore Taluk, and prepared their meals.

Mallanna was induced by the travellers to cook food for himself and they gave him some ghee and other condiments, which he used, and after partaking of the food he became senseless, which was evidently due to the administration of some stupefying drug in the articles supplied to him.

Sheshaiya and Gunda disappeared with the cart and bullocks and when Mallanna slightly recovered his senses he found himself lying on the roadside near Mandya Koppal, Seringapatam Taluk.

The cart and bullocks were traced in the possession of some persons at Huliurdurga, Kunigal Taluk, and at Subbrayan cattle fair, Dodballapur Taluk, respectively.

These persons implicated Sheshaiya and Gunda, the latter of whom was arrested at Hemigiribetta near Huliurdurga. On search of Sheshaiya's house in Huliurdurga, a tin box was found which contained a pill composed of camphor in quantities sufficient to cause insensibility.

Gunda was charged under Sections 328 and 379, Indian Penal Code, before the Amildar and 2nd Class Magistrate of Mysore Taluk, who committed him for trial, in the Court of Session. The Sessions Judge, Ashtagram Division, convicted and sentenced him to 3 years' rigorous imprisonment.

The 1st accused Sheshaiya is still at large and a reward of Rs. 50 is offered for his arrest.

DESCRIPTIVE ROLL.

and history of a man wanted by the Police of the Mysore District, for offences under Sections 328—379 of the Indian Penal Code (Mysore Taluk Crime No. 3—64 of 1892). Warrant issued by the Amildar and 2nd Class Magistrate, Mysore Taluk.

Name.—Sheshaiya. *Father's name.*—Subbanna. *Caste.*—Brahmin. *Age.*—63 years. *Height.*—5'—3½". *Complexion.*—Fair. *Taluk.*—Goribidnur, Kolar District. *Village.*—Dodda Turugode. *Language.*—Kanarese. *Marks of identification.*—A scar near the left ear. 2 scars on the breast and a big mole on the belly. *Profession.*—Formerly Shanbhog of Kunigal, Tumkur District.

In November 1885 this Sheshaiya with a friend of his named Komti Ramachandraiya of Kunigal went to Koratagere, Tumkur District, and purchased for credit some cloths from one Saravana Mudaliar and his son Muttu Mudaliar saying that they were also trading in cloths in the village of Tengode, and gaining familiarity with Saravana Mudaliar and his son, mixed some stupefying drug in their food, which rendered them senseless, and disappeared, with all the cloths the merchants had with them. They were duly arrested and placed before Mr. Krishnaiengar, General Assistant Commissioner and 1st Class Magistrate, Tumkur District, who committed them to the Court of Session, Nundydroog Division on charges under Sections 417—328 and 379, Indian Penal Code, where they were convicted and sentenced to suffer 6 years' rigorous imprisonment each.

2. Sheshaiya after his release from the Mysore Jail, on the 18th November 1891, proceeded to Huliurdurga, Kunigal Taluk, and put up in Hanumanta Chetti's Chatram. He contracted friendship with a Bestar woman named Kempa and remained there for a time. A Vaishnama (Satani) named Gunda of Anatiballi subsequently became his intimate friend.

3. In the beginning of November 1892 Sheshaiya and Gunda went together to Pamanathapur Jatra, Arkalgud Taluk, Hassan District. Here they hired a cart to go to Mysore, Gunda pretending to be the servant of Sheshaiya whom he represented to be a Parpattegar of Mysore. One Mallanna of Dalegaudanhalli, Holé-Narsipur Taluk, drove the cart, and on the way to Mysore they halted at Gungaraj Chatter, Mysore Taluk, and prepared their meals.

Mallanna was induced by the travellers to cook food for himself and they gave him some ghee and other condiments, which he used, and after partaking of the food he became senseless, which was evidently due to the administration of some stupefying drug in the articles supplied to him.

Sheshaiya and Gunda disappeared with the cart and bullocks and when Mallanna slightly recovered his senses he found himself lying on the roadside near Mandya Koppal, Seringapatam Taluk.

The cart and bullocks were traced in the possession of some persons at Huliurdurga, Kunigal Taluk, and at Subbrayan cattle fair, Doddballapur Taluk, respectively.

These persons implicated Sheshaiya and Gunda, the latter of whom was arrested at Hemigiribetta near Huliurdurga. On search of Sheshaiya's house in Huliurdurga, a tin box was found which contained a pill composed of camphor in quantities sufficient to cause insensibility.

Gunda was charged under Sections 328 and 379, Indian Penal Code, before the Amildar and 2nd Class Magistrate of Mysore Taluk, who committed him for trial, in the Court of Session. The Sessions Judge, Ashtagram Division, convicted and sentenced him to 3 years' rigorous imprisonment.

The 1st accused Sheshaiya is still at large and a reward of Rs. 50 is offered for his arrest.

I. The President explained to the Board that the Senior Surgeon having sent in lists of articles required for the various Local Fund Dispensaries in the District, costing Rs. 315 12 11, in order that provision may be made by the Board in accordance with Government Proceedings No. 4097-105—L. F. 284, dated 7th July 1891, one third of the total cost has been included in the Municipal Budgets sent to Government and Government has been asked to include the remaining 2rd cost in the District Fund Budget and read his letter dated 10th ultimo on the subject.

The board recognizing the necessity of the articles indented for by the Hospital Assistants and recommended by the Senior Surgeon, approved the action taken by the President in the matter.

II. Read the Proceedings of the South Mysore Planters' Association, dated 23rd March 1893, relating to the undermentioned subjects and resolved as follows:—

Demand of Pre-eribant Ferry Rates at Anjur Ferry.

Resolution.—The Secretary of the Association is informed that a representation in the matter may be made to the Kadur District Board, if considered necessary, as the Ferry lies within that circle.

Travellers' Bungalows.

"The furniture in these is of the poorest possible description and complaints are very numerous."

"New Bungalow at or near Kumbarhalli on the Belur-Gonebede road would be very useful."

Arrangements are being made to ascertain the wants in each Bungalow, in accordance with the Chief Engineer's Circular No. 57, dated 20th June 1893.

The Executive Engineer informed the Board that, an Inspection Lodge is proposed to be built at Kumbarahalli, for Government officers. The Board recognized the necessity of a Bungalow for accommodation of travellers also and resolved that the matter may be considered in its due course.

Belur Gonebede road.

"The road is not better. There is much room for improvement."

Resolution.—Noted and recorded.

Kerodi Banawasi Kattaya Sukrawarsante roads.

"I regret that as the members who complained have not furnished us with details of where these roads are in a bad state, we have been unable to do anything. There appears to be some confusion as to the names of the roads."

The Executive Engineer has not found the road particularly bad any where. On a similar representation to him, he has called for fuller information. On such information being given, necessary action will be taken. The road is called the *Kattaya Hullibail road*, and not *Kattaya Sukrawarsante*.

Hosur Gonibide road.

"Is still under consideration as has been the case for a long time. The Executive Engineer is believed to favor a trace which would not be approved of by the Association, as it would only benefit a few Native Estates, whereas, if it came from Arehalli to which point the old trace is put in order *via* Guragihalli, Umbalagode, Hosahalli and Kumbarahalli, many members would subscribe."

The Board will be glad to be informed of the amount of subscription which can be calculated upon from the members referred to, with a view of deciding whether this section may not be preferentially taken, if sufficiently decent contributions are made. After ascertaining the amount of contribution, the Executive Engineer will inspect the line and the subject will be finally considered by the Board.

III. Read Government Proceedings No. 850, dated 25th May last, (Muzrai), requesting the Deputy Commissioner to place the question of taking up the Musafarkhana built by Mr. Tiruvengada Mudaliyar, late Amildar, at Arkalgud, before the Board, for consideration.

Mr. Krishnappa, Amildar, informed the board that, the building is a small one and that there is no necessity for additional accommodation to the public, since there is a Chattram built by Mr. Rangappa, late Amildar, near the Fort, besides two other Chattrams in the Petta. The building was also stated to have cost only about one-hundred rupees.

The Board discussed the question fully and resolved that there being sufficient accommodation for the travelling public at the place, it is not desirable to take over the building to its custody.

IV. Read petition dated 10th Instant, presented by the inhabitants of the Hassan Town, praying for the establishment of a Native Hospital.

The board considered that the question is a premature one and that in the present financial condition, the Board, at present, cannot afford the maintenance of an Hospital like the one prayed for.

V. The Receipt and Disbursement account for the year ending 30th June 1893, as per accompanying list was placed before the Board, intimating at the same time that, the expenditure under Civil charges does not include the cost under certain items for the months of May and June, as the adjustment memoranda have not yet been received from the Comptroller.

Resolved that the account be passed and that the Comptroller be addressed to intimate the balance at the close of the year.

VI. Read Chief Engineer's Docket No. 2687, dated 19th June last, to the address of the Executive Engineer, declining to sanction the estimate submitted for improving the track from Archalli to Bikkode. Read also paras 7 and 25 of Government Proceedings No. 17529-33—L. F. 203-92, dated 24th April last cancelling provision for road from Yeslur to Changadihalli.

The Board observed that, owing to the grant of Rs. 20,261 for the incomplete works of 1891-92, including the Rs. 5,000 for the Belur bridge from the District Fund balance, there has been an insufficiency of funds to meet these urgent works, which demand immediate attention and which were therefore provided in the Budget for 1893-94. The Board regrets that the provisions have been struck off from the Budget. The cost of constructing the Bridge at Belur, having all along been met from special grants, out of Local Funds General, the Board resolved to submit a representation to Government, praying that the sum of Rs. 5,000 may be met similarly from special grants to the bridge work and that sanction may be accorded for appropriating that amount on the original works noted in the margin for which estimates are ready in accordance with the resolutions of the Board.

1 *Archalli-Bikkode road.

2 Yeslur Changadihalli road.

The Board resolved to submit a representation to Government, praying that the sum of Rs. 5,000 may be met similarly from special grants to the bridge work and that sanction may be accorded for appropriating that amount on the original works noted in the margin for which estimates are ready in accordance with the resolutions of the Board.

VII. Read Forest Inspector General's Docket No. 94-4, dated 11th Instant, in the matter of opening out a road from a point in Kattaya Hallibail road Baktarvalli plantation.

The Board considers that the road in question, is not of much use, except for Forest purposes and as such resolved, that it is not at present so pressing as other roads and that therefore it is not now possible to contribute towards the work in question.

IX. Read Government Notification No. 76, dated 14th May 1891, para 4, in the matter of deputing 2 members of the Board for the Dasara Representative Assembly, at Mysore.

Resolved that Messrs. Venkataramaiya of Konanur and Venkatesaiya of Banavar be selected for representing the Board, at the Assembly.

X. Read Executive Engineer's Docket No. 541, dated 23rd Instant, applying for a grant of Rs. 12,006 for the Belur Bridge work, for the current year.

Under the representations contained in Resolution No. VI, the Board resolved to respectfully urge the Government for sanctioning the amount as special grants from Local Fund General, as hitherto, as there is hardly any sum available at the credit of the Board for the purpose.

XI. Read letter No. , dated 24th Instant, from Mr. A. R. Park, agent of Mr. J. S. Middleton of Kadamane Estate, furnishing the particulars regarding the Kadamane Maranahalli road, desired in resolution No. 11 of the Proceedings, dated 29th April last.

The Board observed that Mr. Middleton was allowed Rs. 100 annually for maintaining the road prior to 1877 and that this was withheld. The Board wished to ascertain the circumstances under which the grant was stopped and resolved to postpone the consideration of the subject till the next meeting of the Board.

XII. Read Executive Engineer's Docket No. 542, dated 26th Instant, submitting a statement of incomplete works of 1892-93, requiring appropriation for 1893-94.

The Board observe that there are 14 works requiring grant to the extent of Rs. 16,751. Resolved that the same be accepted and the Government addressed to sanction appropriation.

XIII. The President informed the Board of the grant of Rs. 4,000 for the sanitation of rural parts for the current year.

After discussion it was decided that the undermentioned Villages be first taken up and the requisite measures adopted—

1. Yesalur.

2. Ramanathapur.

3. Halebede.

4. Buvanahalli.

5. Javagal.

6. Nuggehalli.

Resolved that estimates for the purpose of bettering the sanitation of these places be called for and sanctioned, as the works to be done have already been defined.

XIV. Mr. Tammaiya informed the Board, that the Hospital Assistant at Belur, is often called away to outlying Villages and there will be none to prescribe medicines to the patients attending the Hospital during his absence. Mr. Krishnaswami Iyer, Assistant Surgeon, explained that Diaries in such instances are received by him from the Hospital Assistants. The Board considers that the Hospital Assistants should not be absent for a prolonged time and requested the Assistant Surgeon to examine the urgency of the cases for which Hospital Assistants were away and issue needful instructions to them in the matter.

- (2) Government Proceedings No. 1152-93 - L. F. 3-93, dated 31st July 1893, observing that no fees need be collected from the persons who avail themselves of Musafarkhanas nor any Bungalow books supplied to them.
- (3) Government Proceedings No. 2003-13—L. F. 346-92, dated 3rd August 1893, directing that for all distances exceeding 5 miles from their ordinary residences, travelling allowances be granted to official as well as non-official members attending the meetings of the Local Fund Boards.
- (4) Government Proceedings No. 2645-7—L. F. 434-92, dated 10th August 1893, sanctioning the establishment of a female dispensary at Kolar.
- (5) Government Proceedings No. 4629-40—L. F. 55-93, dated 7th September 1893, passing orders as regards the pay of the midwives in the State and the general control to be exercised over them.
- (6) Government Proceedings No. 4803-5—L. F. 337-92, dated 16th September 1893, sanctioning the grant of 2 scholarships of Rs. 10 each per month tenable for one year to enable two women to undergo training in Madras as midwives for employment in the District.
- (7) Government Proceedings No. 5337-9—L. F. 114-92, dated 22nd September 1893, sanctioning the entertainment of a permanent establishment to look after the sanitation of the Urigam village and sundry cooli lines situated outside the mining estates.
- (8) Statement of works sanctioned by the Chief Engineer and the Executive Engineer, Kolar Division, under District Funds from July to the end of September 1893.
- (9) Statement of receipts and expenditure of the Local Fund Circle for the year 1892-93.

II. Read the Executive Engineer's docket No. 260, dated 2nd August 1893, with its enclosures, viz:—

- (1) A re-appropriation statement amounting to Rs. 10,000, and
- (2) A statement of incomplete works requiring appropriations from the District Funds to the extent of Rs. 9,814 for the current official year.

Resolved that the statements be approved and the sanction of Government obtained to the same.

III. Read the statement of incomplete works of the Revenue Department requiring appropriations to the amount of Rs. 9,121—3—10 from the District Funds for the year 1893-94.

The Board approve of the statement and resolve that Government be requested to sanction the same.

IV. Read the statement of works proposed by the Amildars and other members of the Board to be undertaken during the year 1893-94 out of the grant of Rs. 15,000 made from the Local Funds General in Government Proceedings No. 5160-68—L. F. 88-93, dated 19th September 1893.

Resolved that the statement amounting to Rs. 14,810 be approved and submitted to Government for sanction.

V. Read Government Proceedings No. 4446-8—L. F. 141-92, dated 9th September 1893, observing that it is the desire of Government that there should be one midwife at least for each Taluk and also this office letter No. 1185-295, dated 25th September 1893, to the address of the Chief Secretary, requesting sanction for the entertainment of 3 more midwives so as to have one for each Taluk and one for the Srinivaspur Sub-Taluk, the services of the Municipal midwife at Kolar being authorized to be utilized also in the outlying villages of the Taluk debiting her pay to the Municipal and District Funds in equal proportions.

It has since been brought to notice that the Municipal midwife at Kolar has a large number of labor cases to attend to in the town and that her services cannot be spared for the cases arising in the interior of the Taluk.

Resolved therefore that the Government be requested to sanction the entertainment of 4 additional midwives on Rs. 15 each per mensem to be employed as shown below, the work of the present midwife at Kolar continuing to be at the sole disposal of the Municipality by which she is paid; 1 for the Kolar Taluk (exclusive of the town) to be paid entirely from the District Funds, the Municipality which pays its midwife at Rs. 15 per mensem being unable to bear any extra charge on account of the Taluk midwife.

One for Srinivaspur Sub-Taluk to be also paid entirely from the District Funds as in the case of the Dispensary charges, the Municipality being too poor to bear its quota of the cost.

Two to make up the complement required for the remaining 8 Taluks, the number already sanctioned by Government being six.

VI. Read the Deputy Commissioner's letter No. 989—244, dated 12th September 1893, to the address of the Chief Secretary, proposing the construction at an estimated cost of Rs. 2,326 of a Chattram at the Kolar Gold Fields for the accommodation of the people attending the Civil and Criminal Courts at the place and requesting sanction to accept the liberal contribution of Rs. 2,000 promised by Mr. Haji Ismail Sait of Bangalore towards the building and to defray the balance of the estimate from the District Funds, the Chattram being maintained from the same funds.

Since sanctioned in Government Proceedings No. 6854-6—L. F. 110-93, dated 12th October 1893. Resolved that the Deputy Commissioner's proposals be approved.

VII. Read Government Proceedings No. 2024-32—L. F. 13-93, dated 3rd August 1893, communicating to the Presidents of the Local Fund Boards for their remarks and suggestions the letter of the Senior Surgeon, suggesting that paupers and sick strangers should not be encouraged to occupy the Hospital wards attached to Local Fund Dispensaries and also Deputy Commissioner's letter No. 1218—303, dated 30th September 1893, to the address of the Chief Secretary submitting certain proposals on the subject.

Resolved that the President's proposals contained in the letter read above be approved.

VIII. The house belonging to Narayana Rao, Deputy Shroff of the Kolar District Treasury, has been selected for locating the Dispensary sanctioned for women and children at the Kolar town in Government Proceedings No. 2645-7—L. F. 434-92, dated 10th August 1893.

The position of this building is most central and convenient for the purpose and the owner is willing to lease the house on a monthly rental of Rs. 9 or to sell it for Rs. 1,600 or for such value as may be fixed by the Public Works Department.

As it is desirable to secure the building permanently in preference to relying upon a temporary lease, resolved that the Government be moved to sanction its purchase, the cost being met from the Provincial and District Funds in equal proportions as the Municipality is too poor to bear its quota of the charge, and that the Executive Engineer be requested to send up a valuation list with a plan of the building for submission to Government.

IX. The question of entertaining an Overseer for the supervision of the District and Local Fund works executed by the Revenue Department discussed at the last meeting was again brought up and the necessity for the employment of Taluk Mestris for the same purpose was also urged on the attention of the Board. The works to be executed by the Revenue Department from the District Funds and

Local Funds General have, of late, greatly increased and the necessity for the employment of a separate agency to help the Amildars and the District Officer in carrying out the same has become indispensable. The want of sufficient professional aid to the Revenue officers whose multifarious duties do not admit of their paying an undivided attention to all the details of the Public Works has led to the heavy lapses of the Budget grants. It is found that the Tank Inspectors attached to the Taluks have, at present, no sufficient scope for employment on the minor irrigation works, owing to the enforcement of the tank maintenance scheme being more or less dependent on willingness or otherwise of the many raiyats who are generally backward in the execution of the necessary earth work to the tanks. It has been suggested that the services of these Inspectors may with advantage be also utilized for estimating for and carrying out the District and Local Funds works under the immediate orders of the Taluk Amildars and Deputy Amildars and that they may each be given a horse allowance of Rs. 10 per mensem with a peon on Rs. 6 for the increased work devolving upon them, the charge on account of such allowances together with the pay of the peons being met from the District Funds and the pay of the Inspectors from the Provincial Funds at present. It is also proposed that all Local Fund works be placed in charge of an Overseer on Rs. 50 per mensem with a travelling allowance of Re. 1 per diem for the days on which he is absent from the Head-quarters on duty, the cost on this account as well as the pay of the peon to be allowed to the Overseer being likewise met from the District Funds.

Resolved that the above proposals be approved and that before they are submitted to Government for sanction the Chief Engineer be requested to favor the Board with his views and suggestions in the matter.

X. Read Government Proceedings No. 6668-9—L. F. 311-92, dated 7th October 1893, approving of the appointment of Javali Subba Sastri of Chikballapur as a member of the Local Fund Board and enquiring whether the Deputy Commissioner would recommend the appointment of another member in place of Lakshman Rao of Sidlaghatta whose retention up to the end of last official year was sanctioned by Government.

Resolved that Government be requested to sanction the retention of Lakshman Rao for a further period of five years as he is an experienced non-official member of the Board.

XI. The Executive Engineer proposes the following works:—

- (1) Special repairs to the Chikballapur portion of the Mulbagal-Goribidnur road.
- (2) Approaches to Goribidnur and Doddakuragodu Railway Stations on the Bangalore-Hindupur Railway.

Resolved that the first mentioned work be postponed for want of funds* and that the last mentioned work is a proper charge on the Provincial Funds.

*Vide Government Proceedings No. 2616—L. F. 110-92, dated 10th August 1893.

XII. Resolved that members having any proposals to be laid before the Board be requested to send them to the President a month before the day fixed for the meeting in view to the same being circulated with the notice to all the members and placed with all necessary references for disposal.

Resolved that the accounts be passed.

2. Read and recorded—

(1) Proceedings of Government No. 4446-S—L. F. 141-92, dated 9th September 1893, sanctioning 4 scholarships for midwives and raising the civil charges for the year 1893-94 by Rs. 480.

(2) Proceedings of Government No. 2003-13—L. F. 346-92, dated 3rd August 1893, sanctioning the payment of travelling allowance to Official and Non-Official Members attending the meetings of the Board.

3. Read Executive Engineer's No. 246, dated 17th June 1893, forwarding for opinion certain correspondence relating to the construction of roads connecting (1) Anaji with Davangere and (2) Koltur with Davangere.

Resolved—Mr. Ranga Rao, dissenting on the sole ground of cost that it is highly desirable that Anaji should be connected with Davangere. As regards the other road, 4 miles of it lie in Mysore and 14 in British Territory.

Resolved—that if the British authorities are prepared to make their portion of this road, this Board would be glad to make the Mysore portion of it. The 1st of these resolutions obviates the necessity of making a Railway feeder from Anaji to Kodaganur. The proposed road from Bidarkere to Bharmasagar is not likely to be of much use and need not consequently be made. A separate report will be made to Government on this subject.

4. Read Appendix 3, Enclosure B, of Proceedings of Government No. 17337-41—L. F. 111-92, dated 22nd April 1893, sanctioning the District Fund Budget of the Chitaldroog District for 1893-94.

Resolved—The only bridge proposed to be built on the Hosdurga-Tarikere road is a large one estimated to cost Rs. 10,000. The Board is too poor to bear this heavy burden. The rest of the bridges on that road in the Kadur District were built from Local Funds General. A similar concession will be prayed for in respect of this bridge. As a District Fund work, the Board finds itself compelled to resolve upon its abandonment, likewise the proposed construction of a few small bridges on the Holalkere-Huliyar road will have to be abandoned for the present for want of funds. A separate communication will be addressed to Government in respect of these two items of work.

5. Read Proceedings of Government No. 5160-68—L. F. 88-93, dated 19th September 1893, sanctioning an allotment of Rs. 15,000 to each of the Districts from Local Funds General.

Resolved—that proposals for the utilization of this grant be made as per lists appended.

6. *Resolved*—that the Board do place on record its appreciation of the very valuable services rendered to it by Mr. Ranga Rao, Executive Engineer, who now stands transferred to the Kadur District.

Statement showing the details of works proposed to be undertaken in 1893-94 in the Chitaldroog District out of the grant of Rs. 15,000, sanctioned for this District from Local Funds General in Proceedings No. 5160-68—L. F. 88-93, dated 10th September 1893.

No.	Taluk.	Village.	Description of Works proposed to be executed.				Deputy Commissioner's opinion on each Work.
			Name.	Necessity or Usefulness.	Approximate cost.	Contribution expected.	
1	Chitaldroog	Ballekatte	Sinking a drinking water well.	Owing to the submergence of the present village by the restoration and enlargement of the Katarahal Tank, a fresh site has been selected for removal of the village. A new well has to be sunk for the use of the inhabitants of the village in place of the one which will be submerged.	500	100	This work is necessary. The contribution promised by the raiyats will be in labor and materials.
2	Do	Kavadigarahatti	The restoration of an abandoned well or the construction of a new one.	The want of water is much felt and has now to be brought from a distance of nearly half a mile.	300	50	There is pressing need for a well in this large and populous village.
3	Do	Bhimasamudra	Construction of a Gokatte	The present village being very unhealthy, a fresh site has been selected for its removal and reconstruction. A good drinking water well has been constructed on this new site by one of the inhabitants of the village. To supply the needs of cattle as well as for other than drinking purposes a pond or Gokatte is necessary. The owner of a small Sagavali Katte has made a present of it for this purpose. It requires to be deepened and revetted and otherwise improved.	500	100	This work is necessary.
4	Do	Chitaldroog to Turuvanur.	Improvement of cart track.	The present cart track is in an unsatisfactory condition. It requires to be improved for the benefit of the villages lying alongside of it as well as of the heavy traffic that passes over it.	1,500	500	This is an important cart track and is in great need of improvement.

No.	Taluk.	Village.	Description of Works proposed to be executed:				Deputy Commissioner's opinion on each Work.
			Name.	Necessity or Usefulness.	Approximate cost.	Contribution expected.	
5	Chitaldroog	Chitaldroog	Bandy stand outside Municipal limits.	The present bandy stand is not only out of repairs, but is also badly situated. It stands in the way of the extension and improvement of Santepete and also makes that locality unhealthy. Its removal to a place outside Municipal limits is therefore necessary.	800	...	Hundreds of carts pass through Chitaldroog on their way to and from Bellary and other places. It is for such carts that the proposed stand is intended. Its early construction is desirable.
6	Do	Kelgate	Park	The Public Offices are situated in the village of Kelagate and far outside the limits of Chitaldroog Municipality. There is a large maidan all round these offices. It is overgrown with weeds and is unsightly in appearance. It is proposed to clear the ground and level it and partly plant it up. This would be useful not only to the town's people but also to people from Taluks who resort to public offices on business. For the latter there is at present no shelter.	500	100	This is a work of pressing necessity. The town of Chitaldroog being partly interested in it, the Municipality is prepared to contribute Rs. 100 towards its cost. In addition to this contribution, a valuable piece of ground has been presented for the purpose, by one of the leading inhabitants of Chitaldroog.
7	Holalkere	Pampapur	Repairing a Gokatte.	This Gokatte being out of order, cattle and men suffer much for want of water.	500	...	This is a useful work and should soon be undertaken.
8	Do	Banjagondanahalli	A Mantapam for travellers.	This village is about 11 miles from Chitaldroog and is midway between that town and Holalkere. There is no accommodation for travellers here.	750	...	There is heavy traffic between Chitaldroog and Holalkere. The want of a halting place is much felt. There is at present no Musafarkhana here. A small Mantap on the road side and within convenient distance of a good drinking water well which is now being repaired is necessary.

9	Hiriyur	.. Hiriyur to Darampur.	Improvement of cart track.	Dharampur is the Head-quarters of the Samat. There are several populous villages between it and Hiriyur. Heavy traffic passes over this tract which is at present in an unsatisfactory condition.	1,000	..	This is a much used cart track and its early improvement is desirable.
10	Davangere	.. Hunsekatte	Restoration of a well	There is an old descending well in this village. It contains good potable water. The revetment has completely collapsed and the well has become almost useless. The inhabitants are thus put to much inconvenience.	868	100	The early restoration of this well is necessary, as the want of drinking water is very much felt in this village.
11	Do	.. Mayakonda	Improvement of a cart track or approach to the Railway Station from the village.	This is a large village between which and the Railway Station, there is no road. In the interests of the people and traffic resorting to the station, this work is necessary.	300	..	This is a useful work and should be taken on hand soon.
12	Hunjur	.. Gollarhatti	Restoration and improvement of an old well.	This village suffers much for want of good drinking water.	500	100	The well in question is out of repair and has become almost completely silted up. It is necessary to have it restored as early as possible.
13	Do	.. Javanagondanahalli	Repairing a descending well.	This is a large well, but is very much out of repair. It is extensively resorted to by the inhabitants of this village.	400	..	This is a useful well and requires early repairs.
14	Jagalur	.. Huchingipur	Sinking a drinking water well.	The inhabitants of this village are badly off for water which is now procured with difficulty from a great distance.	250	..	Want of water being much felt, the excavation of the proposed well is necessary.

XIV. Memo, dated 16th August 1893, from Mr. V. N. Narasimmaiengar on the excess of expenditure incurred in 1891-92 on account of the Sanskrit College.

Resolution.—The Board finds that a private school to which the Municipality paid a grant of Rs. 20 a month was made a Municipal School in 1885, the Board contributing Rs. 50 a month towards the cost. Under the direction of the then Vice-President a Committee of Management was formed, the Municipality does not appear to have exercised any control over the internal management of the school. As the Board has not at any time controlled the Committee, it is not possible to decide whether the existing staff is necessary and their salaries are properly adjusted. Two courses are now open (1) to call on the Committee to place the school under the control of the Board and then decide whether the present arrangements are proper, or to ask the Government whether such auction is necessary or whether the Municipal contribution may be looked as a grant-in-aid. Under the above circumstances the Government be requested to sanction the expenditure incurred.

Receipts during the month	—838	9	7

Balance at the close of the month	57,863	4	8

MEMORANDUM.

Government Proceedings No. 6563-4- L. F. 417-92, dated 6th October 1893.

In the orders above quoted, Government direct the submission of a report whether the Local Fund Board of the District would undertake to maintain the Channagiri and Sagar Malnad road systems, if completed at the cost of Provincial Funds and made over to the Local Fund Committee and the Deputy Commissioner has desired me for an expression of my views.

2. The annual income from Local Funds for the past 5 years, leaving 1891-92 which is of 15 months, is noted below :—

1887-88	84,604
1888-89	84,149
1889-90	83,785
1890-91	83,325
1891-92	93,752
1892-93	86,959

It averages to Rs. 84,565 annually or in round numbers Rs. 85,000. The Civil charges amount to Rs. 15,327 for 1893-94. In years previous to it, these charges were considerably less, principally owing to less number of dispensaries and to no provision for the sanitation of Towns and Villages in the rural parts. I understand that the Civil charges for 1893-94 represents very nearly, if not the full, requirements of the District and that they will not be far exceeded in future years. Taking in round numbers the Civil charges to be Rs. 16,000 and deducting it from the average annual receipts, there remains Rs. 69,000 for expenditure on Public Works.

3. From District Funds, the total length of roads maintained is 450 miles. These include 22 miles of Sagar Malnad and 32 miles Channagiri systems now opened for fair weather traffic but unbridged. The annual charge for maintenance amounts to Rs. 26,065. Besides, a few useful cart-tracks and four ghat passes are maintained by the Deputy Commissioner at a charge of Rs. 2,640. Thus the total annual charge for maintenance of the existing roads is Rs. 28,705. Generally, traffic has been increasing on all the District Fund roads now opened. Two most important and heavily worked roads require larger mileage grants than hitherto granted. They are noted below with the respective increased grant.

	Present Grant.	Proposed Grant.	Increase.
Shimoga, Sorab-Sirsi road, 66 miles ..	60	75	990.
Siralkoppa-Hirekirur road, 9 miles ..	60	100	360.

Total Increase ... 1,350

Thus the total annual charge for the maintenance of roads in the District will be, in round numbers Rs. 30,000. If establishment charge at 20 per cent be added, the net cost of maintenance will be Rs. 36,000.

4. From the foregoing it will be seen that the net balance after deducting recurring annual charges available for original works and improvements of the existing lines of communications will be Rs. 33,000.

5. Of the existing lines of roads maintained by the District Board, those noted in the accompanying statement require bridging or improvement of their surface by metalling at an early date. In the statement full reasons are given for works required with their approximate cost. Besides these urgent works, the following roads form the forecast programme of the Board to be undertaken when funds permit :—

	Rs.
(1) Completing Tirthahalli-Hulikal road, 7 miles, at Rs. 2,000 per mile ..	14,000
(2) Completing Lakshampur-Mavinkar road, 8 miles, at Rs. 2,000 per mile ..	16,000
(3) Opening Holehonnur-Kudligere road, 8 miles, at Rs. 1,500 per mile ..	12,000
(4) Completing Anantapur-Shikarpur road, 10 miles, at Rs. 2,000 per mile ..	20,000
(5) Opening road from Kallurkatte to Humchakatte, <i>via</i> , Humcha, 12 miles, at Rs. 1,500 per mile ..	18,000

6. From the available balance of Rs. 33,000 for original works (*vide* para 4 *supra*) noting Rs. 30,000 every year in 4 years, the most urgent improvements noted in the statement accompanying will have been completed, during which time, the two systems of Sagar and Channagiri roads being in progress, the cost of their maintenance will not be much. After the completion of the improvements of these roads, the Board will have at their disposal Rs. 30,000 to provide for maintenance of the two new road-systems and for the opening of one or two of the foregoing 5 very desirable roads annually.

7. The Sagar system with its two branches and sub-branches and a convenient ghat to the coast will ultimately be about 100 miles. The portions, being in the heavy Malnad, will have to be main-

tained at high mileage rates, say about Rs. 75 per mile. This would be Rs. 7,500 annually. The Channagiri system will comprise the following roads:—

	Miles.
Channagiri to Malebennur	32
Sulekere-Soslu	12
Channagiri-Taverekere	16

These can be maintained fairly at Rs. 50 per mile and would cost Rs. 3,000. When the maintenance of the two systems after completion, is added to the maintenance of the existing roads, the total annual charge will be about Rs. 48,000 inclusive of establishment charges at 20 per cent, against Rs. 69,000 available from District Funds after deducting Civil charges. There will still be Rs. 21,000 for original works, *viz.*, opening more roads referred to in para 5 gradually.

8. To realize the foregoing anticipations, it will be necessary to note for this year from Provincial Funds Rs. 39,777, the amount of the minus balance on 1st July 1893.

The following sums have been expended up to date on the two systems of roads, proposed to be taken up under Provincial Funds:—

	Rs.
Sagar-Malnad—(1) Talguppa to Arlagod	25,668
(2) Avinhalli to Karur	21,260
Channagiri system—(1) Channagiri to Molebennur	27,693
(2) Sulekere to Saslu	8,940

Statement of roads requiring bridging or improvement.

General No.	Name of Road.	Length of Miles.	Amount of Estimate.	Remarks.
1	Metalling and tunnelling Sagar-Siralkoppa road ..	22	15,000	These two roads are heavily worked feeder lines to Byadagi station. The large weekly market at Siralkoppa brings in traffic from remote parts of Dharwar District. The gravelled surface is cut up very much with the heavy traffic.
2	Metalling Siralkoppa-Hirekerur road ..	9	10,000	
3	Bridging Koppa-Tirthahalli road	9	8,000	This is a new road opened last year. All minor tunnels are completed. There are 6 streams, the crossing of which is bad, being throughout paddy flats. They require masonry tunnels.
4	Do Aniantapur-Tirthahalli road ..	33	49,000	This road was opened several years back and is an important feeder to Agumbi ghat from Sagar, Sorab and Shikarpur. It also connects the large supari mart of Humachakatte with Tirthahalli and Nagar systems.
5	Metalling parts of Shimoga, Sorab-Sirsi road	10,000	A few parts of the road require metalling to keep the road surface well in all places where good gravel is not available. The road in these parts gets very heavy.
6	Bridging Honnahalli-Shikarpur road ..	23	8,000	There are 4 unbridged streams on the line, of which one may be provided with a causeway as the crossing is hard. The other 3 streams have very soft beds. The road connects Shikarpur with Honnali and Harihar.
	Total Rs. . . .		1,00,000

Read statement of expenditure on account of Public Works for the quarter from July to September 1893, which amounted to Rs. 11,403—9—7, as per accounts furnished by the Executive Engineer and approved with the following remarks :—

- (1). A sum of Rs. 1,377 was expended on improving the 1st section of the Gundlupet-Chamrajnagar road during the quarter, out of the annual grant of Rs. 3,000. The Amildar of Gundlupet remarked that some of the metal collected for the above road was very large and Mr. Karve explained that they were field metal purposely so collected.
- (2). It was also observed that the Nanjangud-Tirumakudlu-Narsipur road was in a bad condition although a sum of Rs. 427 had been expended out of the grant of Rs. 850 for its annual maintenance.

It will be seen from the statement that more than half the Budget provision for original works and a little more than one-fourth of the same for "Repairs" have been utilized on Public Works during the quarter.

2. Read Statement B of expenditure on well works executed by Revenue Officers for the same period. The Board observed that there were altogether six old works pushed on to completion, two of them being repairs to cattle pounds and the remaining four being repairs to wells. There were also nine works sanctioned or submitted to Government for sanction, amounting in all to Rs. 1,860—4—0, but none of those works had been started or commenced.

3. The Statement (C) of works executed by the Revenue Department from the Local Funds General was next placed before the Board and approved. There were five old works of the previous year amounting to Rs. 677—4—0 and sanction of the Government had been sought for the sinking of 3 road-side wells in the Tirumakudlu-Narsipur, Nanjangud and Hunsur Taluks at a total cost of Rs. 683.

4. Read Government Proceedings No. 2024-32—L. F. 13-93, dated 3rd August 1893, communicating to the Presidents of the Local Fund Boards for their remarks and suggestions the letter of the Senior Surgeon suggesting that paupers and sick strangers should not be encouraged to occupy the Hospital wards of the Local Fund Dispensaries and proposing that separate poor houses should be established for the reception of sick strangers with separate endowments. With reference to this, Dr. Benson remarked that there was no necessity for such an arrangement in this District and that the question did not arise here. Mr. Amble Annaiya Pandit and other members in general were of opinion that the Dispensary wards need not be thrown open to such persons and that there was at the same time no need for the establishment of poor houses as most of the Taluk head-quarters were provided with chattrams.

5. Read letter from the Muzarayi Secretary to the Government, requesting that the matter of opening a chattram at Hunsur may be placed before the District Fund Board.

The members considered that no funds could be spared from the District Funds for the purpose though it was desirable to have one during a portion of the year if any Government Chattram can be transferred to the place.

6. Read letter No. 1764—L. F., dated 22nd June 1893, stating that imprests should be given to the Amildars entrusted with the District Fund works for their execution and recouped once a month.

The Board agreed to the proposal as advisable and necessary for prompt execution of works by the Amildars.

7. Read proposal for opening a chattram at Tirumakudlu-Narsipur at the cost of District Funds submitted by Mr. Somashettra Subba Shetti, a Representative Member of the Dasara Assembly for 1893.
Vide Subject No. 289 of the list submitted from this office.

Resolved that District Funds cannot be spared to open a chattram at Tirumakudlu-Narsipur but Government may, if possible, transfer one of the existing chattrams to that place.

8. Read Proceedings of Government No. 5158-68—L. F. 88-93, dated 19th September, sanctioning an allotment of Rs. 9,000 from the Local Funds General for excavating drinking water wells, &c.

The above provision was explained to the Amildars and they were asked to submit lists of works required to be executed in their Taluks in the order of their urgency and usefulness, on receipt of which, proposals for eligible works will be submitted to Government for approval.

9. Mr. Kesavaingar, Amildar of Hunsur, explained by a report that he was prevented by serious illness from attending the meeting and the report was recorded.
 Maramat No. 30 of 10th October 1893. Mr. T. Ramachendra Rao, Amildar of the Tirumakudlu-Narsipur Taluk, reported that he was engaged on urgent work in connection with a breach of the channel in his Taluk.

10. The meeting began at 2-30 P. M. and closed at 3-55 P. M.

MEMO.

The attention of the Government has for some time past been drawn to the important question of Infant Marriages amongst Hindus, especially amongst Brahmins and Vaisyas.

2. Instances in which the bride is a child five years old and even under, and the bridegroom hardly a year or two older are not uncommon. Cases also occur in which either through cupidity or other unworthy motives on the part of parents or other guardians, girls of very tender age, are given in marriage to old men. Such marriages cannot but be productive of most serious and sad consequences.

The increased chances of a lifelong widowhood in a country where there is a deep-rooted and inflexible opposition, to widow marriages, an opposition which stops at nothing short of a complete ostracism and social excommunication of the offending parties, must be very deplorable indeed. The physical aspect of the question is equally cheerless. Where the boy-husband and the girl-wife are still almost children at the second ceremony of consummation of marriage, it is not difficult to foresee a physical deterioration both in the present and succeeding generations. Strongly as the Government felt the need of reformation in this direction, it considered also, that any legislative action in a social matter of this kind was inexpedient until there was an indication of popular feeling in its favor. It is a matter of congratulation that such an indication has now been furnished and the circumstances which have immediately led to the framing of this Regulation are briefly stated below.

3. The Representative Members of the Dasara Assembly of 1891 pressed the question upon the attention of the Government and discussing it in all earnestness, in its various aspects, invoked legislative action. The hands of the Government being thus strengthened by this representation of the Representatives of the people, it was considered desirable to ascertain how far, if any, the Hindu Shastras encouraged or enjoined Infant Marriages. Taking advantage of the visit to Mysore of the Guru (Spiritual Head) of the Sringeri Matt, a Council of Pandits was convened under his presidency, in which the Shastras were fully examined and discussed. The opinions of the Gurus of other leading Matts were also invited, and as a result of such investigation, the Dewan in his Dasara Address to the Representative Assembly of 1892 made the following statement:—

“ Last year, you may remember, the question of prohibiting Infant Marriages and the custom of marrying young girls to old men was brought forward by you with a view to the Government taking legislative action in regard to it. In fulfilment of the promise I then made, the leading Matts have been consulted and you will be glad to hear that they are all of the opinion that both these practices under certain limits are opposed to the Shastras. Having regard to these opinions and the general popular sentiment as far as we have been able to ascertain it, it would be unwise at present to attempt more than the prohibition of the marriage of a girl below 8 years and the marriage of a man above 50 years with a girl below 16 years, which may be assumed as the age of discretion when a girl may be trusted to exercise her own independent judgment. To treat such marriages as altogether void in law would be no remedy, and will involve endless difficulties regarding legitimacy and rights of inheritance, and the utmost that can be done seems to be to visit the persons responsible for making such marriages with criminal penalties. Such a law would of course have but very limited operation, because of the very small number of marriages prohibited by it. The progressive party may not be quite pleased with so limited a measure, but the limits indicated have the sanction of the different religious heads and of public opinion and the measure would serve as a cautious initial step towards a reform wished for by the more advanced section. In thus stating to you how the question stands it is my desire that you should know what action has followed your previous representation on the subject, and what the present views of the Government are. It now rests with you carefully to consider it from all points of view and tell me what you desire to be done. You know that the moral and religious aspects of the question are grave and it behoves us to proceed with great caution.”

4. It may not be out of place here to state briefly the text of the Shastras bearing on the subject. The Shastras while laying a great stress upon the paramount importance of celebrating the marriage of girls before they attain puberty declare that the best or most approved age for marriage, is the 8th, 9th and 10th years.

ಅಷ್ಟವರ್ಷಾತ್ಪ ವೇತ್ಗಿರಿ ನವವರ್ಷಾ ತುರೋಹಿಣೀ ದಶವರ್ಷಾತ್ಪ ವೇತ್ತ್ ನ್ಯಾ ಅಥೂರ್ಧ್ವರಜಸ್ವಲಾ ||

The above passage rendered in English runs as follows :—

A girl in her 8th year is a Gauri, in her 9th year a Rohini, in her 10th year a Kanya, and above that a Rajasvala :

Then there is a text which declares the gradations of merit according to the age of the girl given in marriage.

The giving in marriage of a Gauri will lead to Nāka, of a Rohini to Vaikunta, and of a Kanya to Brahmaloaka, and a Rajasvala to Hell.

It will thus be seen from the above text, that not only the highest reward is promised for the marriage of a Kanya, but that the very term "Kanyādanam" (giving a girl in marriage) to be technically effectual must be the giving of a 'Kanya' or, a girl in her 10th year. But there is in vogue also another reading of the text quoted above, a reading the genuineness of which however, is doubted by the heads of the Matts, by which a girl in her 8th year is declared a Kanya, a Rohini in the 9th year and a Gauri in the 10th year.

The text condemning the marriage of a man after his 50th year is very explicit.

ಪಂಚಾಶದ್ವತ್ಸರಾದೂರ್ಧ್ವಂ ನಕಾರ್ಯಂ ಪಾಣಿಹೀಡನಂ ಕಲೀಯುಗಸ್ಯ ದುಷ್ಕೃತ್ಯಾ ತ್ತಾ ಶ್ರೀಮಾಹುರ್ಮನೀಷಿಣಃ ||

A man should not marry after his 50th year. The wise say that it should be prohibited on account of the evils of the Kaliyuga.

In November last, when His Excellency the Viceroy and Governor General of India honored Mysore with a visit, a deputation from the Members of the Dasara Representative Assembly waited upon him with an address in which they referred to this question in the following terms :—

"Your Excellency will be pleased to learn that this year His Highness' Government has, in accordance with our representations, promised a measure of social reform in regard to Infant Marriages which, we are assured, cannot fail to be productive of great good to the Hindu community, both in its direct results and as an educative agency."

His Excellency, in reply, while admitting that the subject was beset with difficulties, stated.—

"I shall be glad to hear that your efforts to procure a measure of reform in regard to Infant Marriages are successful."

"We feel that it is mainly to the spontaneous action of the people, whether within or without the limits of British India, that we must look for social reforms of the kind which you desire to effect."

Having given a brief sketch of the historical development of this measure, it will be necessary to say a few words about the measure itself.

The legislation in its present form is very modest indeed. It cannot fully satisfy the aspirations of ardent reformers; neither does it afford a complete and efficient remedy to the existing evils, but it is considered prudent to proceed cautiously, and to devise a measure which, while enlisting popular sympathies, and least provocation of popular prejudices, may in course of time pave the way for larger reforms.

Without going to the extent of forbidding as illegal, Infant Marriages, penalties are attached to them, fixing 8 years for a girl and 14 years for a boy as the minimum age for marriage. In a country where marriages are often celebrated when the girls are 6 or 7 years old and sometimes under, it is something as a start to fix the limit at the completion of 8 years; any higher limit however desirable, might evoke opposition, and the object aimed at, *viz.*, the educating of the people and the enlistment of popular sympathies might be frustrated.

The marriage of a girl under 14 years of age to a man who has completed 50 years is also made punishable and to secure efficiency of trial it is provided that offences under this Regulation should not be tried by Courts inferior to that of a District Magistrate.

No. 112 (Revenue), dated India Office, London, the 10th November 1892.

From—The Right Honourable the EARL OF KIMBERLEY, K. G., Her Majesty's Secretary of State for India.

To—His Excellency the Most Honourable the Governor General of India in Council.

I forward, for the information of Your Excellency's Government, a memorial* from Dr. Augustus Mueller, concerning the expediency of introducing into India his method of treating snake-bites by injection of strychnine.

* Memorial, dated 6th September 1892.

2. In September 1890 Dr. Mueller addressed my predecessor, through His Excellency Lord Hopetoun and the Colonial Office, on the subject of his remedy for the bite of poisonous snakes. It appeared that Lord Hopetoun had at the same time addressed your Government on the matter, and therefore no action was taken here. Dr. Mueller claims that the success of his treatment has been widely admitted in Australia, and he quotes cases (reported on page 1183 of the London *Lancet* for 28th May, 1892) in which Dr. Bannerjee of Pachbhadra in Rajputana tried the strychnine treatment with complete success on six occasions.

3. Sir Joseph Fayrer, whose interest in the subject is well known, advises me that an antidote, supported in this way by the positive assertion of a man of science like Dr. Mueller, ought to be tried, though he adds that his own experience does not warrant an expectation that the antidote will be successful in the case of the *Najidæ*.

4. I gather from the Home Department Proceedings of your Government, for the months of September 1890 and May 1892, that you intended to have Dr. Mueller's method tested in Bengal, but that for different reasons the experiments were not carried out.

5. Seeing that the mortality from snake-bite in India is very large, I commend to your Government the suggestion that careful trials of Dr. Mueller's methods should be held under the supervision of a competent medical committee in Calcutta, and also at selected hospitals like Dr. Bannerjee's at Pachbhadra.

ENCLOSURE.

To Her Most Gracious Majesty Victoria, by the Grace of God, Queen of the United Kingdom of Great Britain and Ireland, and Empress of India.

MAY IT PLEASE YOUR MAJESTY,—The undersigned, who doing a career of 37 years in Australia has made snake-poison his special study, who has succeeded in constructing the first irrefutable scientific theory of its action, and guided by that theory has discovered in strychnine, administered in large doses by hypodermic injections, an infallible antidote to snake poison, seeing the great mortality from snake-bite among your Majesty's Indian subjects, and being perfectly confident that this lamentable loss of human life can be greatly reduced by the introduction of his treatment, which has been universally adopted in Australia, most humbly prays for Your Majesty's gracious intercession and powerful aid in bringing about and hastening on this most desirable consummation. His reasons for approaching Your Majesty on this subject are as follows:—

1. Your Majesty's Indian Government has been twice appealed to in vain, first by letters addressed by the undersigned to the Right Honourable the Secretary of State for India and His Excellency the Viceroy of India respectively, and forwarded through His Excellency the Governor of Victoria, and a second time by a letter from His Excellency the Governor of New South Wales to His Excellency the Viceroy of India, written at the special request of the Honourable Dr. Creed, Editor of the *Australasian Medical Gazette*.
2. The Calcutta medical authorities, to whom the subject had necessarily to be referred by His Excellency the Viceroy of India, have declined to move in the matter, alleging as their reason the unfavorable results of certain experiments made years ago with snake poison and strychnine on dogs, results which, as the writer will show presently, are most fallacious and misleading when applied to men. Nevertheless, the Calcutta authorities have resolved to subject the well and amply proven value of the strychnine treatment on man once more to the test of experiments on animals, more especially dogs, and are apparently labouring under the delusion that this test will be final.

3. This ill-advised course emanates from the erroneous idea that the effects of snake poison and strychnine are identical on dog and man, whereas this supposed identity amounts only to an imperfect analogy. A dog under the influence of snake poison, counteracted by a corresponding quantity of strychnine, is very apt to be thrown into violent and fatal convulsions, unless the antidote is most carefully administered, —in fact, even the snake poison alone usually produces convulsions in dogs, and these are aggravated by strychnine injected both in too small or too large a quantity. It is only when by a lucky chance the exact quantity required is administered to a dog, that he will pass scatheless through the ordeal. In man, on the other hand, convulsions are of rare occurrence. Even when strychnine has been required in doses and quantities that would be absolutely fatal in the absence of the counteracting ophidian venom, convulsions are never ushered in violently as in dogs, but are always preceded by harmless spasms about the neck and face, which are looked for as a signal that the snake poison is conquered, and the antidote for the time being no longer required. It is only when this signal is disregarded and the strychnine injections are continued that tetanic convulsions set in, but they are never as in dogs, and usually pass away quickly.

Your Majesty will have no difficulty in drawing your own conclusions from these facts, and will probably agree with the writer when he asserts that experiments on animals are not only misleading, but also totally uncalled for with regard to the strychnine treatment of snake-bite on man. Its efficacy has now been so thoroughly proven by a severe two years' test at the hands of medical men in all parts of Australia, and even laymen have in emergency cases administered it with so much success, that the proposal to revert it once more to test-experiments on animals, which have always been the bane of research on this subject, is simply ridiculous.

There is no reason to doubt that the writer's treatment will be as successful in India as it is in Australia. In the *Lancet* of the 26th of May last, Dr. Bannerjee, Medical Officer at Pachbhadra Salt Mines, Rajputana, has published seven cases of viper and krait bite treated by him in his hospital with strychnine injections. Some of the persons were in an apparently hopeless state when admitted, but all were discharged cured within a week.

Brilliant results like these must necessarily pave the way for the general adoption of the treatment in India, but this process will be a slow one if left to itself, and still more so if retarded by experiments on animals. Vigorous measures on the part of the authorities are required to stem the fatal tide that now flows at the rate of two millions of human beings in a century. Of the twenty-two thousand that perished last year again, many, no doubt, would have been saved if the writer's appeal to the authorities had not been left unheeded. In this appeal good and sufficient reasons were given to justify the authorities in issuing circulars making strychnine injections in cases of snake-bite compulsory. Cases containing antidote hypodermic syringe and directions for use, together with a stout ligature to apply above the bite and a sharp pair of scissors to cut out the bitten skin, such as are now being sold in large quantities in Australia, might also have been given with perfect safety into the hands of one or two officials in every village, to be available where medical aid is not quickly enough procurable. Your Majesty's Indian subjects are unfortunately not in the position to protect themselves against their insidious enemies, the snakes, as has been done by the Australian colonists, especially in the sparsely populated interior, where no settlement hardly is now without its antidote case, and it therefore devolves on Your Majesty's Indian Government to initiate the measures here indicated.

Your Majesty's long and beneficent reign has been marked by numerous acts on your Majesty's part that will ever shed a bright lustre around Your Majesty's throne. To this "royal diadem of noble deeds" another gem may now be added by Your Majesty bestowing the great boon of comparative immunity from snake-bite on your Indian subjects. Even now, whilst scores of animals are being tortured uselessly at Calcutta, thousands of Your Majesty's Indian subjects, entrusted by Divine Providence to Your Majesty's care, are again perishing from snake-bite. One word from Your Majesty, one single exercise of your royal authority, can save thousands of human lives. It would be high treason to doubt for a moment that this word will be spoken by Your Majesty readily and joyfully. To overcome official perverseness and prejudice now standing in the way, Your Majesty's personal intervention is necessary. To assure Your Majesty that it can be granted not only with perfect safety, but also with absolute certainty of success, it is only necessary to refer to Dr. Bannerjee's cases. They were bites inflicted by *Bungarus caeruleus*, a deadly colubrine snake, and, next to the cobra, the most destructive to human life, and *Echis carinata*, an equally deadly viper. Dr. Bannerjee administered the antidote boldly, giving as much as three and four grains of strychnine to one person, and, when discharging his patients cured within a few days, could not detect a trace of either of the two powerful poisons in them, both having neutralised each other and been thrown out of the system. Even a larger quantity of the antidote will be required to cope successfully with desperate cases of cobra-bites, but the victory of the antidote is assured in every case in which it is administered in Dr. Bannerjee's fearless manner, irregardless of the quantity that may be required of it.

The importance and urgency of this subject must be the writer's excuse for infringing so largely on Your Majesty's time. Now that the snake season has again commenced in India, more than one hundred persons are perishing every day in Your Majesty's Indian dominions

from snake-bite. Thousands of these may yet be saved if Your Majesty orders vigorous action on the lines laid down in this letter to be taken at once.

May the wisdom and the benevolence that characterize all Your Majesty's actions also guide Your Majesty in this important matter, involving the life or death of thousands of Your Majesty's subjects. This is the firm trust and the devout prayer of

YACHANDANDAH (VICTORIA), }
The 6th September 1892. }

Your Majesty's loyal and humble subject,
AUGUSTUS MUELLER, M. D.

Dated Yachandandah (Victoria), the 22nd December 1892.

From—DR. A. MUELLER,

To—The Secretary to the Government of India, Home Department, Calcutta.

I have the honor to inform you that in a despatch, dated 10th November last, which His Excellency the Governor of Victoria has received from the Right Honorable the Secretary of State for the Colonies, and of which His Excellency has caused copy to be forwarded to me with regard to a memorial addressed by me to Her Majesty the Queen, praying for the introduction of the strychnine treatment of snake-bite in India, it has been intimated to His Excellency that any suggestions I may deem it advisable to make with regard to the contemplated trials of my method in India, may be forwarded by me direct to you.

Following out this intimation at the advice of His Excellency, I have now the honor to suggest—

- (1) That experiments on the lower animals with snake poison and strychnine should be altogether dispensed with, since the motornerve-centres of these animals (dogs, cats, guineapigs, etc.) frequently break down under the combined influence of the two poisons, and thus misleading results are obtained.
- (2) That in the case of a human being manifesting the symptoms produced by snake poison, the strychnine should be injected regardless of the total quantity of it that may be required to subdue these symptoms, and that in the event of their returning after a shorter or longer interval, the antidote should again be resorted to.
- (3) That the doses of the latter should never be less than one-tenth of a grain, increased in urgent cases to one-sixth and even one-fourth of a grain, and repeated every 15 or 20 minutes, until the symptoms of snake poison are removed.
- (4) That in certain very acute cases of snake-bite caused by one or both poison fangs having perforated into a vein, the hypodermic method of injection might with advantage be exchanged for the extravenuous one, the antidote thus poured into the bloodstream in large doses and at short intervals being capable of turning the scale of life in favour of persons when already pulseless at wrists and having ceased to breathe, more especially if assisted by artificial respiration.
- (5) That the effect of strychnine when used as an antidote to snake poison is not cumulative, as it is when otherwise administered, and that even when muscular spasms or slight convulsions supervene in the course of the treatment, they are always harmless and can be easily subdued.
- (6) That on the other hand the snake poison, when only partially subdued by an insufficient use of the antidote, overpowers the motornerve-centres often very insidiously, as soon as the effect of the antidote has worn off, and that therefore the danger of the strychnine treatment lies not in too free but too sparing a use of strychnine. Wherever this drug is freely and fearlessly injected, both the viperine and colubrine poison must necessarily yield to it in all ordinary cases of snake-bite in India.

Trusting that these suggestions, which, if carefully observed, will ensure the success of the treatment, may be freely circulated.

MEMO.

The attention of the Government has for some time past been drawn to the important question of Infant Marriages amongst Hindus, especially amongst Brahmins and Vaisyas.

2. Instances in which the bride is a child five years old and even under, and the bridegroom hardly a year or two older are not uncommon. Cases also occur in which either through cupidity or other unworthy motives on the part of parents, or other guardians, girls of very tender age are given in marriage to old men. Such marriages cannot but be productive of most serious and sad consequences.

The increased chances of a lifelong widowhood in a country where there is a deep-rooted and inflexible opposition to widow marriages, an opposition which stops at nothing short of a complete ostracism and social excommunication of the offending parties, must be very deplorable indeed. The physical aspect of the question is equally cheerless. Where the boy-husband and the girl-wife are still almost children at the second ceremony of consummation of marriage, it is not difficult to foresee a physical deterioration both in the present and succeeding generations. Strongly as the Government felt the need of reformation in this direction, it considered also, that any legislative action in a social matter of this kind was inexpedient until there was an indication of popular feeling in its favor. It is a matter for congratulation that such an indication has now been furnished and the circumstances which have immediately led to the framing of this Regulation are briefly stated below.

3. The Representative Members of the Dasara Assembly of 1891 pressed the question upon the attention of the Government and discussing it in all earnestness, in its various aspects, invoked legislative action. The hands of the Government being thus strengthened by this representation of the Representatives of the people, it was considered desirable to ascertain how far, if any, the Hindu Shastras encouraged or enjoined Infant Marriages. Taking advantage of the visit to Mysore of the Guru (Spiritual Head) of the Sringeri Matt, a Council of Pandits was convened under his presidency, in which the Shastras were fully examined and discussed. The opinions of the Gurus of other leading Matts were also invited, and as a result of such investigation, the Dewan in his Dasara Address to the Representative Assembly of 1892 made the following statement:—

“ Last year, you may remember, the question of prohibiting Infant Marriages and the custom of marrying young girls to old men was brought forward by you with a view to the Government taking legislative action in regard to it. In fulfilment of the promise I then made, the leading Matts have been consulted and you will be glad to hear that they are all of the opinion that both these practices under certain limits are opposed to the Shastras. Having regard to these opinions and the general popular sentiment as far as we have been able to ascertain it, it would be unwise at present to attempt more than the prohibition of the marriage of a girl below 8 years and the marriage of a man above 50 years with a girl below 16 years, which may be assumed as the age of discretion when a girl may be trusted to exercise her own independent judgment. To treat such marriages as altogether void in law would be no remedy, and will involve endless difficulties regarding legitimacy and rights of inheritance, and the utmost that can be done seems to be to visit the persons responsible for making such marriages with criminal penalties. Such a law would of course have but very limited operation, because of the very small number of marriages prohibited by it. The progressive party may not be quite pleased with so limited a measure, but the limits indicated have the sanction of the different religious heads and of public opinion and the measure would serve as a cautious initial step towards a reform wished for by the more advanced section. In thus stating to you how the question stands, it is my desire that you should know what action has followed your previous representation on the subject, and what the present views of the Government are. It now rests with you carefully to consider it from all points of view and tell me what you desire to be done. You know that the moral and religious aspects of the question are grave and it behoves us to proceed with great caution.”

4. It may not be out of place here to state briefly the text of the Shastras bearing on the subject. The Shastras while laying a great stress upon the paramount importance of celebrating the marriage of girls before they attain puberty, declare that the best or most approved age for marriage is the 8th, 9th and 10th years.

ಅವ್ಯವಸ್ಥಾ ದ್ವೈವೇದ್ಯೋರಿ ನವವಸ್ಥಾ ತುರೋಹಿಣೀ | ದಶವರ್ಷಾದ್ಭವೇತ್ಕನ್ಯಾ ಅಥಬಾರ್ಧ್ವಂರಜಸ್ವಲಾ ||

The above passage rendered in English runs as follows:—

A girl in her 8th year is a Gauri, in her 9th year a Rohini, in her 10th year a Kanya, and above that a Rajasvala :

Then there is a text which declares the gradations of merit according to the age of the girl given in marriage.

The giving in marriage of a Gauri will lead to Náka, of a Rohini to Vaikunta, and of a Kanya to BrahmaloKa, and a Rajasvala to Hell.

It will thus be seen from the above text, that not only the highest reward is promised for the marriage of a Kanya, but that the very term "Kanyadanam" (giving a girl in marriage) to be technically effectual must be the giving of a 'Kanya' or, a girl in her 10th year. But there is in vogue also another reading of the text quoted above, a reading, the genuineness of which however, is doubted by the heads of the Matts, by which a girl in her 8th year is declared a Kanya, a Rohini in the 9th year and a Gauri in the 10th year.

The text condemning the marriage of a man after his 50th year is very explicit.

ಪಂಚಾಶದ್ವತ್ಸರಾದ್ಯರ್ಧ್ಯಂ ನಕಾರ್ಯಂ ಪಾಣಿಪಿಡನಂ | ಕಲೀಯುಗಗನ್ಯದುಷ್ಪತ್ಯ ತ್ವಾನ್ಯಮಾಜುರ್ಮನೀಷಿಣಃ ||

A man should not marry after his 50th year. The wise say that it should be prohibited on account of the evils of the Kaliyuga.

5. In November last, when His Excellency the Viceroy and Governor General of India honored Mysore with a visit, a deputation from the Members of the Dasara Representative Assembly waited upon him with an address in which they referred to this question in the following terms:—

"Your Excellency will be pleased to learn that this year His Highness' Government has, in accordance with our representations, promised a measure of social reform in regard to Infant Marriages which, we are assured, cannot fail to be productive of great good to the Hindu community, both in its direct results and as "an educative agency."

His Excellency, in reply, while admitting that the subject was beset with difficulties, stated.—

"I shall be glad to hear that your efforts to procure a measure of reform in regard to Infant Marriages are successful."

"We feel that it is mainly to the spontaneous action of the people, whether within or without the limits of British India, that we must look for social reforms of the kind which you desire to effect."

6. Having given a brief sketch of the historical development of this measure, it will be necessary to say a few words about the measure itself.

The legislation in its present form is very modest indeed. It cannot fully satisfy the aspirations of ardent reformers; neither does it afford a complete and efficient remedy to the existing evils, but it is considered prudent to proceed cautiously, and to devise a measure which, while enlisting popular sympathies, and least provocative of popular prejudices, may in course of time pave the way for larger reforms.

Without going to the extent of forbidding as illegal, Infant Marriages, penalties are attached to them, fixing 8 years for a girl and 14 years for a boy as the minimum age for marriage. In a country where marriages are often celebrated when the girls are 6 or 7 years old and sometimes under, it is something as a start to fix the limit at the completion of 8 years; any higher limit, however desirable, might evoke opposition, and the object aimed at, viz., the educating of the people and the enlistment of popular sympathies might be frustrated.

The marriage of a girl under 14 years of age to a man who has completed 50 years is also made punishable and to secure efficiency of trial it is provided that offences under this Regulation should not be tried by Courts inferior to that of a District Magistrate.

MEMO.

The attention of the Government has for some time past been drawn to the important question of Infant Marriages amongst Hindus, especially amongst Brahmins and Vaisyas.

2. Instances in which the bride is a child five years old and even under, and the bridegroom hardly a year or two older are not uncommon. Cases also occur in which either through cupidity or other unworthy motives, on the part of parents or other guardians, girls of very tender age are given in marriage to old men. Such marriages cannot but be productive of most serious and sad consequences.

The increased chances of a lifelong widowhood in a country where there is a deep-rooted and inflexible opposition to widow marriages, an opposition which stops at nothing short of a complete ostracism and social excommunication of the offending parties, must be very deplorable indeed. The physical aspect of the question is equally cheerless. Where the boy-husband and the girl-wife are still almost children at the second ceremony of consummation of marriage, it is not difficult to foresee a physical deterioration both in the present and succeeding generations. Strongly as the Government felt the need of reformation in this direction, it considered also, that any legislative action in a social matter of this kind was inexpedient until there was an indication of popular feeling in its favor. It is a matter for congratulation that such an indication has now been furnished and the circumstances which have immediately led to the framing of this Regulation are briefly stated below.

3. The Representative Members of the Dasara Assembly of 1891 pressed the question upon the attention of the Government and discussing it in all earnestness, in its various aspects, invoked legislative action. The hands of the Government being thus strengthened by this representation of the Representatives of the people, it was considered desirable to ascertain how far, if any, the Hindu Shastras encouraged or enjoined Infant Marriages. Taking advantage of the visit to Mysore of the Guru (Spiritual Head) of the Sringeri Matt, a Council of Pandits was convened under his presidency, in which the Shastras were fully examined and discussed. The opinions of the Gurus of other leading Matts were also invited, and as a result of such investigation, the Dewan in his Dasara Address to the Representative Assembly of 1892 made the following statement:—

“Last year, you may remember, the question of prohibiting Infant Marriages and the custom of marrying young girls to old men was brought forward by you with a view to the Government taking legislative action in regard to it. In fulfilment of the promise I then made, the leading Matts have been consulted and you will be glad to hear that they are all of the opinion that both these practices under certain limits are opposed to the Shastras. Having regard to these opinions and the general popular sentiment as far as we have been able to ascertain it, it would be unwise at present to attempt more than the prohibition of the marriage of a girl below 8 years and the marriage of a man above 50 years with a girl below 16 years, which may be assumed as the age of discretion when a girl may be trust-

"ed to exercise her own independent judgment. To treat such marriages as altogether void in law would be no remedy, and will involve endless difficulties regarding legitimacy and rights of inheritance, and the utmost that can be done seems to be to visit the persons responsible for making such marriages with criminal penalties. Such a law would of course have but very limited operation, because of the very small number of marriages prohibited by it. The progressive party may not be quite pleased with so limited a measure, but the limits indicated have the sanction of the different religious heads and of public opinion and the measure would serve as a cautious initial step towards a reform wished for by the more advanced section. In thus stating to you how the question stands, it is my desire that you should know what action has followed your previous representation on the subject, and what the present views of the Government are. It now rests with you carefully to consider it from all points of view and tell me what you desire to be done. You know that the moral and religious aspects of the question are grave and it behoves us to proceed with great caution."

4. It may not be out of place here to state briefly the text of the Shastras bearing on the subject. The Shastras while laying a great stress upon the paramount importance of celebrating the marriage of girls before they attain puberty, declare that the best or most approved age for marriage is the 8th, 9th and 10th years.

ಅಪ್ಪವರಾಧ್ಯವೇದೋಕ್ತ ನಪವರಾಧ್ಯತುರೋಹಣೀ | ದಶವರ್ಷಾದ್ಯವೇತ್ತ ನಾಪ್ಯ ಅಧಃಪರ್ವಂರಜಸ್ವಲಾ ||

The above passage rendered in English runs as follows:—

A girl in her 8th year is a Gauri, in her 9th year a Rohini, in her 10th year a Kanya, and above that a Rajasvala:

Then there is a text which declares the gradations of merit according to the age of the girl given in marriage.

The giving in marriage of a Gauri will lead to Náka, of a Rohini to Vaikunta, and of a Kanya to Brahmaloaka, and a Rajasvala to Hell.

It will thus be seen from the above text, that not only the highest reward is promised for the marriage of a Kanya, but that the very term "Kanyadanam" (giving a girl in marriage) to be technically effectual must be the giving of a 'Kanya' or, a girl in her 10th year. But there is in vogue also another reading of the text quoted above, a reading, the genuineness of which however, is doubted by the heads of the Matts, by which a girl in her 8th year is declared a Kanya, a Rohini in the 9th year and a Gauri in the 10th year.

The text condemning the marriage of a man after his 50th year is very explicit.

ಪಂಚಾಶತ್ಯತ್ರರಾದೂರ್ವ್ಯಂ ನಕಾರ್ಯಂಪಾಣಿಪೀಡನಂ | ಕಲೇರ್ಯುಗಸ್ಯದಾಪ್ಯತ್ವಾ ತ್ವಾತ್ಯಜ್ಯಮಾಹುರ್ಮನೀಷಿಣಃ ||

A man should not marry after his 50th year. The wise say that it should be prohibited on account of the evils of the Kaliyuga.

5. In November last, when His Excellency the Viceroy and Governor General of India honored Mysore with a visit, a deputation from the Members of the Dasara Representative Assembly waited upon him with an address in which they referred to this question in the following terms:—

"Your Excellency will be pleased to learn that this year His Highness' Government has, in accordance with our representations, promised a measure of social reform in regard to Infant Marriages which, we are assured, cannot fail to be productive of great good to the Hindu community, both in its direct results and as an educative agency."

His Excellency, in reply, while admitting that the subject was beset with difficulties, stated.—

"I shall be glad to hear that your efforts to procure a measure of reform in regard to Infant Marriages are successful."

"We feel that it is mainly to the spontaneous action of the people, whether within or without the limits of British India, that we must look for social reforms of the kind which you desire to effect."

6. Having given a brief sketch of the historical development of this measure, it will be necessary to say a few words about the measure itself.

1183

The legislation in its present form is very modest indeed. It cannot fully satisfy the aspirations of ardent reformers; neither does it afford a complete and efficient remedy to the existing evils, but it is considered prudent to proceed cautiously, and to devise a measure which, while enlisting popular sympathies, and least provocative of popular prejudices, may in course of time pave the way for larger reforms.

Without going to the extent of forbidding as illegal, Infant Marriages, penalties are attached to them, fixing 8 years for a girl and 14 years for a boy as the minimum age for marriage. In a country where marriages are often celebrated when the girls are 6 or 7 years old and sometimes under, it is something as a start to fix the limit at the completion of 8 years; any higher limit, however desirable, might evoke opposition, and the object aimed at, *viz.*, the educating of the people and the enlistment of popular sympathies might be frustrated.

The marriage of a girl under 14 years of age to a man who has completed 50 years is also made punishable and to secure efficiency of trial it is provided that offences under this Regulation should not be tried by Courts inferior to that of a District Magistrate.

PART IV. OFFICIAL PAPERS.

ADDRESS OF THE DEWAN OF MYSORE TO THE REPRESENTATIVE ASSEMBLY HELD AT MYSORE, *on Monday, the 23rd. October 1893.*

GENTLEMEN,

I have received His Highness the Maharaja's commands to place before you, at this the thirteenth meeting of this Assembly, a brief account of the working of the principal Departments of the Administration during the past year, together with statements of the year's income and expenditure and an exposition of our general financial condition.

H. E. the Viceroy's Visit.—It is His Highness' pleasure that I should in the first place refer to the most important event of the year—the visit paid to the State by Their Excellencies the Viceroy and the Marchioness of Lansdowne. The genuine loyalty and enthusiasm with which the subjects of Mysore from all parts of the State greeted Their Excellencies was a source of sincere gratification to His Highness. You doubtless remember the kind words of appreciation in which His Excellency spoke of the various measures of reform and improvement introduced since the Rendition by His Highness' Government and his particular approval of the present constitution and functions of the Assembly. I have now the honor to address. And I need hardly say that we all recall with special pride and gratification the passage in His Excellency's speech in which he was pleased to say "there is probably no State in India where the Ruler and the ruled are on more satisfactory terms or in which the great principle upon which His Highness has insisted, that Government should be for the happiness of the governed, receives a greater measure of practical recognition."

Finance.—The past year was one of exceptional financial prosperity, during which the State Revenue from all sources (excepting Railways) reached the unprecedented figure of 165½ lakhs. Beginning with 103 lakhs in 1880-81, we find no important variation till we come to 1885-86. That year marks the commencement of an era of progressive improvement, during which each year has added a few lakhs to the Revenue realized in the preceding year, till during 1892-93 we were able to secure the large increase of Rs. 24,40,561 over and above the realizations of 1891-92. The statement of Receipts before you shows at a glance the various sources which have contributed to this increase.

Before proceeding to offer any comments upon this statement, I must explain that though the year 1891-92 consisted of 15 months from April 1891 to June

1892, yet for purposes of comparison we have to confine our attention to the 12 months of that year commencing July 1891 and ending June 1892, and to consider, with reference to the figures for those months, whether there has been any improvement or falling off in individual items of Revenue during 1892-93. This process will enable us to draw reliable inferences, because the two periods of 12 months under comparison were identical as regards collection operations under all heads of Revenue including Land, Mohatarfa, Sandal, &c.

With these preliminary remarks, I shall now ask your attention in some detail to the two items of Land Revenue and Excise which together have mainly contributed to the increased Revenue of the year.

Land Revenue.—Under Land Revenue proper, the increase was Rs. 16,49,000, of which about 3 lakhs were due to expansion of cultivation, the extent of lands under occupation having increased from 5,685,162 acres in 1891-92 to 5,891,268 in 1892-93. The remainder of the increase was due to the fact that last year was one of seasonable rain-fall during which we were not only able to realize the year's demand to the usual extent, but also to collect the greater portion of the sum of about $7\frac{1}{4}$ lakhs which, owing to the unfavorable seasons of 1891-92, had to be allowed to stand over for remission or realization during the following year (1892-93).

It may be interesting to note in this place that the area brought under cultivation during the last 12 years has increased by 49 per cent and the assessment by 31 per cent, showing an average annual increase of 4 and $2\frac{1}{2}$ per cent respectively. The increments in previous years were partly due to the operations of the Survey and Settlement Department, but in the year under review the increase which was 3.6 per cent in area and 3.8 per cent in the assessment, was entirely due to the larger extent of land taken up for cultivation.

Excise.—The most noteworthy improvement has occurred under this head: The Revenue from Arrack alone shows an increase of Rs. 5,95,193. Excluding Rs. 1,46,754 which represents the realizations of the arrears of the previous year, the net increase due to the operations of the year was Rs. 4,48,439, a large portion of which was the direct result of the revised system of arrack management introduced in April 1892. The cheaper manufacture of spirit under that system enabled us to increase the duty from Rs. 3—5—0 per gallon 20° Under Proof to Rs. 4 in the Maidan and Rs. 3—14—0 in the Malnad tracts. This increase of duty which involved no increase of price to the consumer, accounts for over 2 lakhs of the additional Revenue derived, while the sale of the right of vend brought in over one lakh; and these two causes which had the effect of securing to Government money which hitherto formed the profits of middlemen, yielded in the aggregate an increase of Rs. 3,28,000. The remainder of the increase, about Rs. 1,28,000, represents the Revenue in respect of 37,655 gallons, the quantity consumed in 1892-93 in excess of the consumption of the preceding year. This increased consumption has occurred chiefly in the Districts of Kolar and Kadur and in the Cities of Bangalore and Mysore. The large increase in Kolar, occurring as it did in spite of a reduction in the number of shops, was entirely due to the extensive employment of labor in and about the Gold Fields, while the minor increases in the Bangalore and Mysore Cities were owing to the large influx of Vaddars and other drinking classes in search of employment on the Special Improvement works. In Kadur, 19 new shops had to be opened in localities where illicit distillation by Lambanis, employed on coffee estates was known to exist. The increase in consumption in the District was 8,586 gallons for the whole year.

The Revenue from Toddy amounted to Rs. 13,22,086 as against 9,23,555, showing an increase of Rs. 3,98,531. This result may be regarded with unmixed satisfaction as the increased Revenue has been secured by the mere abolition of intermediaries under the revised system, described in my last year's Address. You will doubtless remember that that system aimed at the substitution of over 1,000 small toddy farms in the place of the 8 large District farms which previously existed, but there was under it no increase in the number of shops for the sale of toddy and therefore presumably no increase in the quantity of liquor consumed. The small farms are naturally able to pay the Government for the lease of its toddy groves higher rents than could be expected from the larger farms.

Thus under "Excise" including both Arrack and Toddy, the improvement has been Rs. 9,58,648.

Forests.—There was a decrease of about Rs. 75,000 under Sandalwood. The quantity sold was 1,992½ tons against 2,439½ tons in the previous year, but the average price obtained per ton was Rs. 448.8, or Rs. 46.5 better than in 1891—92. Under "Timber and Firewood" also, there was a diminution of about Rs. 96,000, due to the smaller quantity felled and sold, while under "Miscellaneous" there was an increase of Rs. 38,000, due chiefly to larger sales of Minor Forest produce: so that (excluding Elephant Kheddass) the decrease on the year's Forest operations was Rs. 1,33,242.

From Elephant Kheddass the receipts were better than in the previous year by Rs. 21,000, and last year was the first in which the Department was self-supporting.

Stamps.—There was an increase due to general causes of more than half a lakh which accrued chiefly under general stamps, and duty and penalty on unstamped or insufficiently stamped documents.

Mohatarfa.—The increase of Rs. 38,520 was owing mainly to the collection of the previous years' arrears.

Gold Mining.—There was an increase of Rs. 71,673 in the amount of Royalty paid to Government. The quantity of gold extracted from the Kolar Gold Mines in 1892 exceeded that of the previous year by 32,757 ounces. Further particulars with regard to the working of the several mines will be found in this statement:—

Surplus Investment account.—The income from the invested surplus shows a decrease of over 2½ lakhs; owing to the sale in 1891-92 of 4 per cent Government Securities to the extent of 28½ lakhs in order to provide the funds required to meet the famine which then threatened and for the larger cash balance necessitated by the altered khistbandi. On the securities thus sold, we realized large premia amounting to Rs. 2,10,000 shown as profit in that year's account, but the reduction of the amount in Four Per Cents has caused in the following year (1892-93) a decrease in the interest on the invested surplus.

Having thus explained in some detail the variations in the more important sources of our income, the general result is summarised in a few words. Land Revenue and Excise together showed an improvement of 26½ lakhs. To this there was a small addition of about 2½ lakhs from other sources, chiefly Gold Mines, Stamps and Mohatarfa. The total increase thus obtained was reduced by a falling off of 4½ lakhs under Forests and in the Income from the invested surplus, thus giving for the net result an increase of 24½ lakhs.

The total expenditure under all heads amounted to Rs. 134,71,166 against Rs. 130,16,906 in the previous year. Please see Expenditure Statement before you.

Net Increase.....					4,54,260	

The increase of expenditure was chiefly under "Military," "Excise" and "Public Works."

More than a lakh of rupees was expended under "Military" on account of the new pattern equipment and saddlery for the Imperial Service corps, purchase and maintenance of transport ponies, purchase of arms and accoutrements and of stallions for the Kunigal Farm.

* Note.—When the English loan of £1,200,000 was raised, the local loan of 20 lakhs ceased to be one for Railway purposes.

The increased expenditure of Rs. 86,423 under "Excise" was due partly to charges incurred (on account of additional establishment and transport of liquor) for working the revised system already described, and partly to the extra payment made to Messrs. Parry and Co. for importing liquor from Nellikuppam in the Madras Presidency during those months in which, owing to scarcity of water, distillation could not be carried on at Bangalore.

The Public Works Expenditure which will be noticed hereafter, exceeded that of the previous year by Rs. 1,89,000.

It will be seen from this statement that our surplus for the past year (excluding Railway transactions) was Rs. 30,84,056 as compared with one of Rs. 3,80,000 of the previous year which, owing to the scarcity which prevailed and the altered khistbandi, was in some respects abnormal. The surplus of 1890-91, which in all respects was a normal year, was Rs. 22,03,449, and as compared with it, the improvement last year was Rs. 8,80,607.

Having in the preceding paras reviewed the net result of the ordinary Revenue and Expenditure of the State during the past year, I shall next place before you a statement exhibiting our transactions in respect of the State Railways:—

General Financial results.—Thus it will be seen that out of the year's surplus of Rs. 30,84,056, we had to meet the deficit of Rs. 3,55,965 on account of the Mysore-Harihar Railway and after putting by 4 lakhs of rupees towards the redemption of our Railway loans and investing Rs. 18,95,158 on new Railways, we had a balance of Rs. 4,32,933, which, added to the opening balance of Rs. 89,31,909 on 1st July 1892, gave a closing balance on 30th June 1893 of Rs. 93,64,842. Out of this amount Rs. 47,23,700 were held in Government Securities and the remainder in the Madras Bank and the various local Treasuries. In addition to this, we had at the close of the year Rs. 18,73,022 to the credit of the Railway Loans Redemption Fund, besides Rs. 32,53,439 of State Funds invested as capital outlay on the various State Railways other than the Mysore-Harihar line. Our present financial position (leaving out of consideration about 75 lakhs spent since the Rendition on reproductive Irrigation works) is as shown below:—

Budget for 1893-94. (Vide Appendix).—The Budget estimate of income from all sources for 1893-94 (Railways and Civil and Military Station excepted), has been framed for Rs. 158,63,000, or about 7 lakhs less than the actuals of 1892-93. This reduction is chiefly under Land Revenue and is nearly equal to the unusually large amount of arrears of 1891-92 realized in 1892-93 as already explained. The expenditure under all heads during 1893-94 has been estimated at Rs. 135,61,000 as compared with Rs. 134,71,000 of 1892-93, the most important increase being under Public Works, on account chiefly of works of sanitation and the new water-supply project for the Mysore City.

District Funds.—Having so far dealt with revenue derived for State purposes, we may now turn to the subject of taxation for local purposes. The receipts, during 1892-93, of District Local Funds administered by the 9 District Boards, amounted to Rs. 5,77,000 and the whole of this sum, together with Rs. 19,000 out of the balance at the credit of this Fund, was expended on various objects of public utility, the chief among them being Roads, Dispensaries, Village Sanitation, Travellers' Bungalows, and Musafarkhanas. The incidence of taxation during the year amounted to 1 anna 10 pies per head of population.

Local Funds General.—The receipts under this Fund which is administered by Government for the same purposes as the District Local Funds, amounted to Rs. 1,91,000. Out of this, Rs. 1,11,000 were expended during the year, chiefly through the agency of the District Fund Boards, on drinking-water wells, village chavadis, cart-tracks and similar works.

Constitution of District Fund Boards.—Last year, you brought to the notice of Government that the constitution of District Fund Boards is weak in the non-official element, but as the existing rules passed in 1874 provide only for a maximum of seven non-official members, the defect can be remedied only by legislation. You will therefore be glad to learn that the Local Boards Regulation, now under the consideration of the Government, provides for a minimum of 12 non-official members in each Local Fund Board.

Municipalities.—The next class of local taxation is under Municipalities. The number of Municipalities during 1892-93 was 101 with a population of 576,000. The total Municipal receipts for the year amounted to Rs. 4,44,000, of which House-tax, Mohatarfa and Octroi contributed Rs. 2,85,000, and Miscellaneous sources Rs. 1,59,000. The incidence of Municipal taxation was 7 as. 11ps. The total expenditure amounted to Rs. 4,35,000, of which 1,54,000 was spent on conservancy and establishments, Rs. 1,19,000 on roads and other useful works, Rs. 36,000 on schools, Rs. 31,000 on the supply of medical aid, Rs. 24,000 on lighting, and the balance on minor establishments and miscellaneous improvements.

Last year, representations were made from several Municipalities that the Government might forego (in all Municipalities, as it had already done in some) its share of the Octroi and Mohatarfa revenues realized within Municipal limits. You doubtless remember that the Octroi is levied by a large number of Municipalities in the Province under special conditions which make a share in the proceeds, a legitimate source of State income. Indeed, it was on the express condition of receiving such a share that the Government abolished the Sayer (always a source of State revenue) on certain articles, and the Municipal population has largely benefited by such abolition. But the Government have always been willing to deal with the Municipal Boards in a liberal spirit when the question is one of funds to enable them to cope with the sanitary requirements of their towns, and it is in accordance with this policy that the Government share of octroi realizations have recently been ordered to be given up in their favor. You will also be glad to learn that the Government share of the Mohatarfa

has been given up in all Municipalities which bear Police charges, and the question of giving up the Mohatarfa in other Municipalities will receive early attention. I must take this opportunity of impressing upon Municipal Boards that these concessions are conditional upon their maintaining a uniform and fair system of taxation without any exemption of particular individuals or classes, and that they will be expected to devote the augmented resources placed at their disposal for the fullest benefit of the Municipal population.

Public Works.—We may next turn our attention to the working of the Public Works Department.

On Public Works, other than Railways, the total expenditure during the year ending 30th June 1893, aggregated Rs. 30,83,999, as noted below:—

Provincial Funds	Rs. 24,42,511
District Funds	4,98,758
Irrigation Funds	1,23,512
Palace Funds	19,218
Total.....					30,83,999

In addition to this amount, Rs. 71,962 were expended on works debitable to other Departments, making the total outlay Rs. 31,55,961, which was distributed under the several heads of service as follows:—

Under "Military," the expenditure was chiefly incurred on the construction of new Barr Lines at Bangalore, Mysore, Shimoga and Hassan, where they were badly wanted. Another set of lines for the Silledars at Mysore has been completed. It has since been decided to locate the Imperial Service Regiment, and the transport corps attached to it, near the Mysore City at the site above Wantikoppal village recently selected by His Highness the Maharaja, the present stables and connected lines being altered and converted into a Dharmasala which is one of the most urgent wants of the City at present.

Under "Civil Buildings," Rs. 3,93,000 were spent. The more important works completed during the year were the Laboratory and Lecture Hall for the Central College and the extension of the Government Press Buildings in Bangalore; the quarters and office for the Special Magistrate at Urigam Gold Fields in the Kolar District; and the Government House, the Public Offices, the Military Secretary's quarters and quarters for the Principal of the Maharaja's College, in Mysore. The construction of Court Houses for the District

Judge, Sub-Judge and the Munsiff at Mysore, progressed satisfactorily. A Meteorological Observatory at Bangalore was sanctioned during the year and is already approaching completion. In addition to these, 4 new Taluk Cutcherries, 3 Munsiffs' Courts, 10 Dispensaries, 4 Educational Buildings, and 9 Police Lines and Stations, besides many other minor works, were in hand.

Under Communications, the important bridge across the Bhadra at Balehonnur in the Kadur District was completed and the site for a new bridge across the Kaveri at Yedatore was selected and foundations for 8 of the piers and the right abutment filled in.

The expenditure under "Miscellaneous Public Improvements" was incurred on several works of public utility in the Mysore City, such as the construction of the Chamraja road, laying out and forming the new suburb Chamrajapura, and the Lansdowne Bazaars, all incomplete works of previous years. To perpetuate the memory of that distinguished statesman, the late Sir James Gordon, K. C. S. I., who was long connected with Mysore both as Guardian to His Highness the Maharaja and Chief Commissioner of the Province, and who was the First British Resident subsequent to the Rendition, a bronze statue has been obtained from England and will shortly be erected near the Public Offices in this City.

The Darbar's share of the cost of the Hebbāl Temporary Water-supply Scheme for Bangalore, which was necessitated by the failure of the existing sources of supply, amounted to Rs. 51,616.

The question of water-supply to the Bangalore City has engaged the most anxious attention of the Darbar and they have decided to enlarge and improve the Hessarghatta tank, and utilize it partly for the water-supply of the City and partly for irrigation purposes. The enlargement of the tank is being vigorously executed and the details of lifting, delivery and distribution will soon be finally settled so as to give the City an assured water-supply at as early a date as possible. It is understood that the Government of India have decided upon carrying out what is known as the Maligal Scheme for the separate supply of the Civil and Military Station.

For the better water-supply of the Mysore City, a project estimated to cost about 3 lakhs has already been sanctioned. Under this project water from the Kaveri is to be pumped up a height of 237 feet by means of the water power which is available at the Devaroy Channel, then to be brought into Mysore by gravitation in a masonry conduit, and after proper filtration, to be distributed so as to supply also the higher portions of the City not commanded by the Kukarhalli tank, thus superseding the separate scheme for a high level supply which had been under contemplation for several years.

Irrigation.—I now come to the most important head of Public Works, *viz.*, "Irrigation." Works under this head have, as usual, progressed well, the outlay thereon during the year being Rs. 9,81,321. The restoration and improvement of the important tanks and channels referred to in the last year's Address, most of which were incomplete works of previous years, progressed satisfactorily, and some of them have been completed, *viz.*:—

- (1.) the Borankanaye Dam in Chiknayakanhalli Taluk, at a cost of nearly 2 lakhs, the left bank channel of which is now in hand ;
- (2.) the Handanhalli tank in the Sira Taluk, at a cost of about Rs. 60,500 ;
- (3.) the Rekalgere works in the Chellakere Taluk, costing Rs. 1,30,000. This channel is reported to have acted twice successfully filling two of the upper tanks in the series

- (4.) the widening of the Ramasamudram channel and extending the Tippur and Keggere branch channels in Yedatore Taluk, which has been in progress since February 1889, cost Rs. 83,000 ;
- (5.) the extension and improvement of Rampur channel in Nanjangud Taluk, costing about 3½ lakhs ;
- (6.) the restoration of Danawadi tank, in Shimoga Taluk, cost Rs. 36,000 ;
- (7.) the Sagal anikat and channels, cost Rs. 48,000 ;
- (8.) the improvement of Arsinkatte channel in Chikmagalur Taluk, at a cost of Rs. 20,000 ;
- (9.) the restoration of Yegati anikat and channel in Kadur Taluk, at a cost of Rs. 37,000 ; and
- (10.) the construction of Mallali anikat and channel, at a cost of Rs. 20,000.

The other more important works that were in hand during the year were those specified in the list below, on all of which satisfactory progress is reported—

Bangalore Division.—(1.) Restoring the Bandur-Virupakshipur tank in Chennapatna Taluk, estimate Rs. 38,000. Work practically completed. (2.) Restoring Mallur tank in the same Taluk. Estimate Rs. 21,000. Practically completed. (3.) Restoring Ujani Gaurammankere tank in Dodballapur taluk. Estimate Rs. 22,000. (4.) Restoring Suli-bele Dodkere and Chikkere in Hoskote Taluk. Estimate Rs. 30,000.

Kolar Division.—(1.) The 3 important reservoirs across the Chitravati, Pinakini and North Pennar, which are all approaching completion. (2.) Restoring the Mudayadi tank in Kolar Taluk (estimate Rs. 44,000). (3.) The Thimmanaiyakanhalli agrahar tank (estimate Rs. 32,000) and (4.) the Burdagunte Timmasani anikat and channel (Rs. 36,000), both in Sidlaghatta Taluk.

Tumkur Division.—(1.) The restoration of Gundagal tank in Maddagiri Taluk (estimate Rs. 26,000); (2.) Kurihalli and (3.) Mayasandra tanks in Sira Taluk, estimates Rs. 45,000 and Rs. 26,000, respectively; (4.) the Mayasandra tank in Tiptur Taluk (Rs. 25,000); (5.) the Bomanayakanhalli and (6.) Kayathanagere Tanks in Pavagada Taluk, estimates Rs. 24,000 and 42,000 respectively.

Chitaldroog Division.—(1.) Constructing new tank across Hirehalla near Tippaiyankote (estimate Rs. 28,000), practically completed; (2.) new tank across Madihalla near Vaduvalli in Hiriyur Taluk, estimate Rs. 47,000.

Mysore Division.—Improving and extending the Hulhalli channel in Nanjangud Taluk (estimate Rs. 6,05,000). Half completed.

French Rocks Division.—(1.) Improving the Maddur Ane channels in Mandya Taluk, (estimate Rs. 82,000). Work far advanced. (2.) Improving and extending the Kalhalli channel in Krishnarajpete Taluk, estimate Rs. 50,000). Practically completed. (3.) Improving the Sulikere tank in Malvalli Taluk (estimate Rs. 1,59,000). One lakh has already been spent on this work.

Hassan Division.—Improving and extending the north channel of Sriramadevara Dam (estimate Rs. 82,000). Work approaching completion.

Shimoga Division.—Improving the Sulikere tank and channels in Channagiri Taluk, estimate Rs. 66,000.

Kadur Division.—(1.) Constructing an anikat across the Veda river to feed the Chikkapatnagere tank in Kadur Taluk (estimate Rs. 40,000); and (2.) improving the Yellambalasi anikat and channel, (estimate Rs. 34,000). The latter has been completed.

The following new important Irrigation works were sanctioned during the year :—

1. A new tank across the Jinigihalla, near Kathral in Chitaldroog.
2. Restoration of Bannur anikat and channels and Kukasandra tank in Kadur.
3. Restoration of Chiksandra tank in Tumkur.
4. Constructing an anikat across the Sankartirtha stream near Singapur and restoration of Bidaganhalli tank in Hassan.
5. Restoring Mutsandra tank in Hoskote Taluk.

1218

In connection with the subject of Irrigation, I stated last year that investigations were being made for improving and extending the irrigation capacities of the existing anikats on the Kaveri river. I personally inspected some of the anikats on this river, and came to the opinion that the improvement of the existing anikat at Alalkatte would be the best of all possible schemes for extending and perfecting our Irrigation system under the Kaveri. Three alternative projects for this scheme have been prepared by the Public Works Department, and the smallest of them estimated to cost about 18 lakhs odd has since been approved by His Highness the Maharaja. This project is to build a new anikat across the Kaveri, 750 feet long, on the site, and in lieu, of the existing very straggling Alalkatte Anikat, which is 2,500 feet in length and is very old and leaky, and does not admit of ready improvement. The new Anikat will cost about Rs. 80,000 and the sluices on the left and right banks some Rs. 30,000 more. The anikat and the head works on the left bank are necessary for an efficient supply to Saligram, Mirle, Hampapur and other existing channels on that bank. Schemes for the improvement and extension of the rather complicated Irrigation system embracing these channels had from time to time been submitted for the consideration of the Government, but none of them could be sanctioned as they were all more or less unsatisfactory. It has now been finally decided to supersede them all by the new proposed works. There can be no doubt that these works are the best for the left bank irrigation and there can also be no two opinions about the desirability of their immediate execution on that ground alone. Regarding the right bank channel, it is impossible to decide finally how far it should extend until we have more definite information than we now possess, of the quantity of water which we can at this point draw off from the river without prejudice to the existing cultivation lower down. The alignment of the channel has however been most carefully made so as to permit of its being executed hereafter if considered expedient to the full length of $69\frac{1}{2}$ miles, so as to fill the Kukarhalli tank at Mysore. It will be seen that this is capable of ready accomplishment, because the difference of level between the waste weir of the last named tank and the crest of the proposed anikat at Alalkatte is 100 feet. Under such circumstances, it is proposed to carry out in the first instance the anikat and head works and a sum of Rs. 60,000 is provided for this purpose in the current year's Budget. Next will be taken in hand the improvement and extension of the left bank irrigation, and the new right bank channel will come last and be necessarily spread over a series of years. This plan will not be felt as a grievance by the City of Mysore, because, as I already explained, we are giving it an efficient and independent supply from the Kaveri direct.

Sanitation.—The want had long been felt of a separate qualified Engineer who could give his exclusive attention to developing effective measures for the sanitation of the Cities of Mysore and Bangalore and of the more populous towns in the State, as well as to designing and carrying out works of water-supply and drainage wherever required. To this duty Mr. Standish Lee was appointed under the designation of the Sanitary Engineer with the Government. You have noticed that liberal grants have annually been made from State Funds for Miscellaneous Public Improvements. It is the intention of the Government to continue such grants in future to the extent from time to time found necessary, and at the same time to give for other sanitary works, during the next five years, an additional sum of one lakh per annum, out of which grants-in-aid or loans could be granted to the various Municipalities in need of such help from the Government. In addition, the Sanitary Engineer is expected to supervise the preparation and execution of the larger projects carried out from Municipal Funds. The Government anticipate that the measures above described will ensure, under adequate

professional supervision, efficient work in all Municipalities, and result in an improvement of their general sanitary condition.

Railways.—The Mysore State Railway now consists of two parts under different conditions of management and apportionment of profits. The Mysore-Harihar Section the capital outlay on which has been met from the English Railway Loan, is under the management of the Southern Mahratta Railway Company and will continue so for 39 more years, during which period they have to receive one-fourth of the net profits. The other Sections—Mysore-Nanjangud, Bangalore-Hindupur and the Kolar Gold Fields—on all of which the capital outlay has been met from State Funds are to remain in the possession and management of the Darbar, who propose to enter into short term working agreements varying from 1 to 3 years, with the Southern Mahratta Railway Company for the Nanjangud and Hindupur Sections, and with the Madras Railway Company for the Kolar Gold Fields Branch. The important section of the Bangalore-Hindupur Railway (51½ miles of metre gauge) was completed, with the exception of the Pinakini bridge, the supply of girders for which was delayed by the manufacturers. The first section, from Yesvanthpur Junction to Doddballapur, was opened for traffic on the 15th December 1892, and the second section to Guntakal was opened, on 17th September 1893. This through-line promises to advance the commercial prosperity of Mysore by connecting it with Bellary, Secunderabad and the north-east of India and by bringing Singarani coal for consumption on our Railways, and will also give a special impetus to the traffic in cotton and grain. The Kolar Gold Fields Branch Railway, 10 miles of standard gauge, intended for the benefit of the large gold mining industry in Kolar has made good progress. Rails were linked through and coal trains commenced running on the 25th September. The line will, it is anticipated, be opened for traffic next month.

The survey of the proposed Railway from Nanjangud to Gudalur was completed, but the results are discouraging; and the Governments of Madras and Mysore have concurred that the project should give way to that proposed to connect Nanjangud with Erode. Reconnaissance Surveys of alternative lines of Railway to connect this State with the West Coast have been undertaken by the Mysore Railway Department on account of both the Darbar and the Madras Government. The most important of them is—Arsikere, *via* Hassan, to Mangalore with a short branch to the Gorpur Harbour.

Judicial Changes.—The periodical absence from Shimoga of the District and Sessions Judge of Nagar for holding Criminal Sessions at Chikmagalur and Chitaldroog, being found to interfere seriously with the prompt disposal of the Civil work of the Division, the Government have, on the recommendation of the Chief Court, given its sanction for a Sub-Judge's Court at Shimoga. Before however actually establishing such a Court, the Chief Court are investigating certain proposals for an increase to the Munsiffs' Jurisdiction, which will have the effect of affording considerable relief to all District Courts and Sub-Courts, and, in the Nundydroog Division, of enabling us to abolish the present system under which appeals from Munsiffs lie direct to the Chief Court.

Medical.—There are throughout the Province 102 Hospitals and Dispensaries, including the 8 Dispensaries newly opened during the year. The total number of patients treated in them was 556,631 against 537,787 in the previous year.

In July 1892, the Government, on the recommendation of the Mysore City Municipality, sanctioned, as an experimental measure, the establishment at Mysore of an institution for the treatment of patients according to indigenous methods, (Karnatic and Yunani), subject to the supervision of a Hospital Assistant appointed to watch the preparation of the medicines and note the results. The number of patients treated during the half-year ending 30th June 1893 was 20,514, the average daily attendance being 279.80. The institution is doing good work and is very popular.

The number of cases vaccinated during the year was 84,752 against 74,282 in 1891. The increase is mainly due to lanoline paste being available in any quantities required, at the Vaccine Institute opened in March 1892, and the consequent removal of the difficulties, previously experienced by vaccinators, in procuring a sufficient supply of lymph in arm-to-arm vaccination. The percentage of success obtained from vaccination with the paste was found to be about 10 per cent higher than the average for the last 10 years under the old method.

Agriculture.—Experimental cultivation of superior varieties of American cotton was continued during the year with success. The seed was supplied to the Chitaldroog, Kolar and Shimoga Districts. In the cotton growing Taluk of Davangere in the Chitaldroog District, the raiyats have intimated their desire to extend the cultivation of the new varieties.

Fresh seed potatoes received from England during the year are under propagation in the Botanical Gardens. Experience has shewn that the steady importation of new varieties of the tuber has done much towards eradicating potato disease.

An experiment, which promises to introduce the remunerative cultivation of coffee into the Maidan parts of the Province, has been tried by Mr. Meenacshaiya with marked success in his Farm at Bangalore. Coffee which hitherto was believed to thrive only in the Malnad has been proved to be capable of attaining vigorous growth and abundant bearing under irrigation in the Maidan, and this experiment, in which Mr. Meenacshaiya has shown such commendable enterprize, will be watched with much interest by the Government.

A collection of Botanical drawings is in progress and the Superintendent of the Government Gardens has now in the Press an enlarged edition of "The Forest Trees of Mysore and Coorg."

The large Sugar manufactory which Messrs. Arbuthnot and Company are opening at Goribidnore, in the centre of an important sugar-cane tract, may be expected to give additional stimulus to its growth; whilst Narsimiah's iron foundry at Chikballapur not only meets the growing demand for sugar-cane iron roller mills, but what is even of greater importance, is able to repair them when out of order.

Muzarayi.—The management of Muzarayi Institutions by a separate Superintendent has been attended with beneficial results. Reforms are being gradually and cautiously introduced, to prevent abuses and to ensure the proper application of the allowances granted to temples and charitable institutions maintained by the State. To secure further improvement in this branch of the Administration, it is necessary to have the cordial assistance and co-operation of the persons who are interested in the institutions and with this view local committees have been constituted in the larger centres of population. The cash payments now made annually by Government to temples, chatrams

and matts amount to more than 3 lakhs, besides land endowments, the annual value of which is nearly 11 lakhs.

As an encouragement to the establishment and maintenance of charitable, benevolent and educational institutions, the Government have inaugurated a system under which funds assigned for such purposes could be deposited in Government Treasuries on favorable rates of interest, not exceeding 5 per cent per annum. The deposits under this system now amount to Rs. 2,34,000, and are as follows:—

No.	Name of Depositor.	Amount.	Purpose.
1	Rai Bahadur Dharma Ratnakara A. Narayanaswami Mudaliar.	75,000 40,000	For the maintenance of the Schools established by him. For other charities.
2	Devaraja Bahadur of Mysore	1,15,000 50,000	For expenditure on education in Mysore.
3	Gurikar Marimallappa of Mysore	30,000	For the up-keep of the Marimallappa's School, and for the assistance of certain poor Scholars.
4	Byrappa, Patel of Konepalli, Chintamani Taluk, and his brothers	14,000	For the up-keep of the Chattram built by them on the Chintamani-Sidlaghatta High road and also for feeding travellers, &c.
5	Polepalli Subbaiya Chetty of Bangalore	12,000	For the up-keep of the Chattram constructed by him near the City Railway Station at Bangalore, and feeding deserving caste students therein.
6	Nanjaraj Bahadur of Mysore	10,000	For the maintenance of the Nanjaraj Bahadur Chattram at Mysore.
7	Bakshi Venkatachar of Bangalore	3,000	For feeding indigent and deserving Sanskrit students and needy travellers at Melkote, Seringapatam Taluk.
	Total Rs.....	2,34,000	

Education.—On the 30th June 1893, there were 1,698 public institutions with 76,963 pupils. The number of private institutions on the same date was 2,112 with 26,586 pupils. There were altogether 91,904 boys and 11,645 girls under instruction. It is interesting to note that during the decade from 1881 to 1891 the number of educated males increased from 234,698 to 261,508 or 11·4 per cent, and of educated females from 9,082 to 17,885 or 96·3 per cent.

The total expenditure from all sources on public instruction was Rs. 7,62,695. The State Funds contributed Rs. 4,14,435, the Local Funds Rs. 1,78,070, Municipal Funds Rs. 20,031, Fees Rs. 72,496 and all other sources Rs. 77,663. The total expenditure exceeded that of the previous year by Rs. 36,226.

The revised standards of instruction in Primary and Middle schools were brought into force from the 1st January 1893. The Text-book Committee has arranged for the preparation of three Kannada Readers and is engaged in considering the subject of adopting a uniform system of Kannada spelling in school text-books. A scheme for the opening of two Normal Schools for the training of Kannada Pandits and teachers of

Middle and Primary Vernacular schools has been sanctioned. During the months of April and May, normal classes were held at the Head-quarters of all the Districts for the instruction of vernacular masters in Agriculture and Hygiene. The Village schools have been ordered to be placed under the supervision of local committees. Schemes for the extension of Primary Education in Villages and for the improvement of Anglo-vernacular Education in Municipal towns are under consideration.

Female Education.—There were altogether 140 girls' schools in the State. The total expenditure on female education was Rs. 96,832, to which the State contributed Rs. 61,072. Seven candidates from Her Highness the Maharani Girls' School and two from the Wesleyan Mission Girls' School, Tumkur, passed the Lower Secondary Examination. The organisation and discipline of the Maharani Girls' School have been greatly improved and the staff strengthened by the appointment of Miss Kumudini Khastigiri, B. A., of Bethune College, Calcutta, as Assistant Lady Superintendent. There are fifteen pupils in the High School Department who are being trained as teachers, and the number of pupils above the age of twelve is 44.

Technical Education.—In the Industrial School which was opened in Mysore in February 1892, instruction is given in carpentry, blacksmith's work, masonry, pottery, rattan work and free-hand drawing. An improved and time-saving method of weaving has been recently added to the industries taught. On the 30th June last, the total number of pupils in the school was 104, of whom 10 were Brahmins, 19 Mahomedans, 15 Native Christians, 2 Eurasians and 58, Hindus of different castes. Considering the short period the school has been in existence, the progress reported is encouraging and it is hoped that the institution will grow in usefulness and be the precursor of similar institutions in other parts of the Province.

It is proposed to establish an Engineering School for the training of Sub-Overseers and Taluk Mestris. The want of such an institution has been greatly felt as the supply of well-trained subordinates for the Public Works Department is very limited at present.

Archæology.—The remarkable discovery of certain Edicts of Asoka in the Chitaldroog District, which was announced to you last year, has formed the subject of learned papers published during the year in Paris, Vienna and London. At the end of each of the inscriptions were a few letters which remained unread. These have now been deciphered by professor Buhler of Vienna and prove to be the word *Lipikarena*, indicating the profession of the engraver, in Kharoshtri or Baktrian-Pali characters, which are written from right to left.

Other important inscriptions found during the year shew that the Pallava prince Nolambádhirāja ruling in the Sira country married the younger sister of the Ganga king Nítimarga of Talkad. Also that Irungola, who was conquered by the famous Hoysala king Vishnu Vardhana, was in possession of the fortified hill of Nidugal in Pavagada Taluk, and that the line of kings to which he belonged had their capital at Henjara, which is a place specially mentioned in several curious inscriptions claiming great antiquity, one of them being similar in characters and much of its contents, to the grants in the Shimoga District said to have been made by Janamejaya at the *Sarpa-yága*, more than 3,000 years B. C.

Oriental Library and Press.—609 printed works and 712 manuscripts were added to this Library at a cost of Rs. 4,065, bringing up its contents to 1,653 of printed and 1,021 of manuscript works. The large increase in the number of visitors and persons who

obtained loans of the Library books, testifies to the usefulness and popularity of the institution.

Among the rare manuscripts may be mentioned a complete copy of the Satapatha Brahmana of the White Yajus, in the Kāva Sakha with accent signs throughout. This work has never yet been published. Philosophical treatises on the three religious systems of Southern India are a marked feature of the manuscript collection, the Advaita and Visishtadvaita being represented by such eminent writers as Appayya Dikshit and Vedantachar, while the Dvaita system is represented by the founder of the sect, Madhvachar himself. There are also several treatises on Jain religion, and the Puranasara is an important find in Puranic literature. The Kannada collection contains Udbhata Kavya, the oldest work in Lingayat literature and now for the first time brought to the notice of the public.

The printing of the Apastamba Grihya Sutra, with Sudarsana's gloss and of the Apastamba Paribhasha Sutras, with the commentaries of Kapardiswamin and Haradatta, has been completed. Some printing work was also done in connection with an interesting treatise by the Hon'ble Rajamantra Pravina Chentsal Row Pantulu Garu C.I.E. on the subject of Gotras and Pravaras. The works now in the Press are Taithiriya Sambhitha of the black Yajus with Bhatta Bhaskara's commentary, the Dhatu Vritti, a masterly treatise on grammar by the famous scholiast Mādhavachar, and a descriptive Catalogue of the Palace Library.

Pallegars.—With a view to ameliorate the condition of stipendiary Pallegars in Mysore, His Highness has been pleased to sanction an increase to their pensions. The pensions paid to them amounted to Rs. 17,133 per annum during Dewan Purnaiya's Administration, and to Rs. 22,257 in 1834-35. In 1860, Sir Mark Cubbon raised the pensions by 50 per cent and again, in 1864-65, Mr. Bowring sanctioned a further increase of 25 per cent. Having regard to the cost of living at the present day, a general increase of 50 per cent was sanctioned from the 1st July 1893. These pensions now amount to about Rs. 56,580 per annum.

Legislation.—Infant marriage.—Of measures of legislation which now engage the attention of the Government, the most important is the one relating to the prohibition of infant marriages. A Regulation drafted on the lines indicated in my Address of last year has been published with the view of affording the fullest opportunity for discussion and criticism. The measure is in some quarters regarded as an undue interference with the liberty of the subject, but you are doubtless aware that the action of the Government in the matter is merely a response to the general sentiment of the country which, we have reason to believe, demands the abolition, under the authority of the law, of certain usages which are as much opposed to the spirit of the Hindu Shastras, as to the best interests of society. Whether these usages prevail to an extent which can be held to justify the proposed action of the Government, is a question on which important light is thrown by the tables of the last Census. These show that the number of married girls under 9 in 1891 was 18,000 as compared with only 12,000 in 1881. The increase is 50 per cent, whereas the increase of population during the same period of 10 years was only 18 per cent. Again out of 971,500 married women in the country in 1891, the statistics specially collected at the last Census show that 11,157 had been married at or before the age of 4 (74 in the first year, 349 in the second, 2,347 in the 3rd and 8,387 in the fourth year) and 181,000 between the ages of 5 and 9. Of the 192,000 girls thus married before nine, 3,560 became widows at that early age. In regard to boys it has been ascertained that 512 had been married before four, 8,173 between 4 and 9,

and 72,831 between 10 and 14, thus giving a total of 81,516 boys all married before 14. The raising of the marriageable age of boys to 14 will also react beneficially on the marrying age of girls, for considering the disparity that generally prevails in this country between the ages of husband and wife, it is not too much to infer that in nearly all boy-marriages under 14, the girls are more likely to be under than above 9 years of age, and therefore the raising of the marriageable age of boys to 14, will enable the parents of nearly 82,000 girls, to put off their marriage beyond the age of 9.

These facts are sufficient to establish that the evil which we wish to remedy is one of some magnitude, and what is worse, it is one which shows signs more of growth than of decline.

Game Law.—You are aware that a Game Law has been pressed upon the consideration of Government by the Planting Community and persons interested in sport. The subject is one which is surrounded by unusual difficulties; for while such a law must be mainly grounded upon considerations of humanity and the necessity for conserving useful species of animals and birds, it must not attempt to extinguish the immemorial rights of the people to kill game for food or sport, nor to create any monopoly in animals and birds in a state of nature for the benefit of Government or of sportsmen. A Draft Regulation has been framed and is now before you and the Government will be glad to have any suggestions you may wish to offer in regard to it. To ensure the due propagation and perpetuation of useful species of game and fish, the Regulation provides for the protection of such species, with reference to time, place, sex and growth, manner of killing and the implements of destruction. It also empowers the Government to afford absolute protection to specified insectivorous birds and to animals and birds whose killing would be unsportsmanlike or viewed with popular disfavor. The killing of animals or birds for the commercial value of their skins and plumage is proposed to be placed under due restrictions by means of a system of licenses.

It will thus be seen that the legislation proposed is based both upon humane and utilitarian considerations, and respecting as it does the reasonable claims of the community in regard to sport and food, it is the hope of Government that the Draft Regulation will meet with the unanimous approval of this Assembly.

Constitution of the Assembly.—I have no doubt that the members for the towns of Shimoga, Kolar and Tumkur will be glad to learn that, taking into consideration their large population and general importance, His Highness has been pleased to grant them the privilege of returning three members to this Assembly instead of two as heretofore like other Mofussil District Head-quarter Municipalities.

And now before concluding this address, gentlemen, it gives me much pleasure to announce to you that His Highness the Maharaja has been pleased to accede to your request, made on more than one previous occasion, to make the membership of this Assembly tenable for three years. His Highness trusts that this concession will enhance your interest in the various questions with the representation of which you may be charged and, by affording you the opportunity for continuous action in respect of them, be the means of adding largely to the practical usefulness of this Assembly.

MYSORE,
23rd October 1893. }

K. SHESHADRI IYER,
Dewan of Mysore.

Proceedings of the Government of Mysore, Education Department.

ORDER.—C. No. 121; DATED, 21ST NOVEMBER 1893.

A new classification of standards and a curriculum of studies for Primary and Middle Schools were notified in 1892 after the principal Headmasters had been given an opportunity to express their views upon them. Government while desiring to maintain the principle that the study of English should be commenced at a stage when the pupil has acquired a sufficient knowledge of his mother-tongue to be able to learn with ease a foreign language, resolves to modify in matters of minor detail the existing classification of standards and curriculum. The revised classification of standards is given below and the revised course of studies will be published in the official Gazette at an early date. Both will come into force from the 1st January 1894 in all Government, Municipal, Aided and other recognized schools of this State in which general education is imparted to boys.

2. In the subjoined classification the schools are called Vernacular or English according as the First Language taught in them is a Vernacular or English.

3. No boy shall be admitted into the I. Class of an English School that has not passed the II Vernacular Standard.

Standard of admission into the lowest class of an English School.

(a.) No boy that has received his education in a Government, Municipal, Aided or other recognised Vernacular School shall be considered to have passed the II Vernacular standard unless he has passed in (1) a Vernacular, (2) Arithmetic, and (3) Geography by that standard. The admission of

boys from such schools into the I. Class of an English School will be made (1) on the production of a certificate signed by a Deputy Inspector showing that the boy seeking admission has passed the II Vernacular standard in the subjects named above, or (2) on the production of a leaving certificate signed by the Headmaster of a recognised Vernacular School showing that the boy has qualified himself for promotion to the III Vernacular Class, or (3) on the results of an examination held by the Head Master of the English School to ascertain whether the boy seeking admission is qualified in the subjects of the II Vernacular standard specified above.

(b.) Boys educated in indigenous Vernacular Schools or at home may be admitted into the I Class of an English School if in an admission examination held by the Headmaster of the English School they show that they possess a knowledge of their Vernacular and of Arithmetic equivalent to that of a boy who has passed the II Vernacular standard from a Government, Municipal, Aided or other recognized Vernacular School.

4. In the Middle or Anglo-Vernacular Classes of English Schools, English shall be taught as a language, and the medium of instruction shall be a Vernacular. The Text-Books of History and Geography used in these classes shall be those written in a Vernacular language. English Text-Books of History and Geography may however be used in the V Class at the discretion of the Headmaster. In the High School Classes English shall be the medium of instruction in all subjects.

5. As a special case, the Managers of Aided High Schools in the Town of Bangalore where there is a considerable population of races speaking the Tamil and Telugu languages will be permitted to add below the I Anglo-Vernacular Class two additional Classes corresponding to the I and II Vernacular Classes, in which a little of English may at the discretion of the Managers be taught in addition to the course prescribed for these classes in Kannada, Arithmetic and Geography. In these Schools the Managers may also at their discretion use English Text-Books of History and Geography in classes below the V Anglo-Vernacular Class.

Secretary.
